#### Associate Administrator for Commercial Space Transportation; Availability of a Final Programmatic Environmental Impact Statement (PEIS) for Licensing Launches

**AGENCY:** Federal Aviation Administration (FAA), Associate Administrator for Commercial Space Transportation (AST).

**ACTION:** Notice of availability.

**SUMMARY:** In accordance with requirements of the National Environmental Policy Act of 1969, as Amended, and FAA order 1050.1D—Policies and Procedures for Considering Environmental Impacts, the FAA announces the availability of a Final Programmatic Environmental Impact Statement (PEIS) for Licensing Launches.<sup>1</sup> The Programmatic EIS analyzes the potential environmental impacts of the proposed action of licensing launches, which is also the preferred alternative. Potential impacts of the proposed action and alternatives were analyzed in three major categories, atmospheric impacts, noise impacts and other environmental impacts. The FAA examined the range of potential impacts by considering the environmental characteristics of six different ecosystems representing various existing and potential launch locations throughout the U.S. and abroad.

The PEIS covers licensed launches from both existing government launch facilities and non-federal sites. The PEIS will update and replace the FAA's 1986 Programmatic Environmental

<sup>1</sup> Please note that the term "commercial launch" as used throughout the Draft Programmatic EIS has been removed from the Final Programmatic EIS and replaced with the term "licensed launch". This change was made for clarification purposes and not in response to public comment. The change was made because the FAA licenses some launches that are not strictly commercial in nature. This change does not alter the description of the proposed action or alternatives, nor does it alter the analyses contained in the Programmatic EIS.
