

equipment and functions, and shall provide to requesting carriers loop and splitter functionality that is compatible with any transmission technology that the requesting carrier seeks to deploy using the high frequency portion of the loop, as defined in this subsection, provided that such transmission technology is presumed to be deployable pursuant to § 51.230.

(5) *Loop conditioning.* (i) An incumbent LEC must condition loops to enable requesting carriers to access the high frequency portion of the loop spectrum, in accordance with §§ 51.319(a)(3), and 51.319(h)(1). If the incumbent LEC seeks compensation from the requesting carrier for line conditioning, the requesting carrier has the option of refusing, in whole, or in part, to have the line conditioned, and a requesting carrier's refusal of some or all aspects of line conditioning will not diminish its right of access to the high frequency portion of the loop.

(ii) Where conditioning the loop will significantly degrade, as defined in § 51.233, the voiceband services that the incumbent LEC is currently providing over that loop, the incumbent LEC must either:

(A) Locate another loop that has been or can be conditioned, migrate the incumbent LEC's voiceband service to that loop, and provide the requesting carrier with access to the high frequency portion of the alternative loop; or

(B) Make a showing to the relevant state commission that the original loop cannot be conditioned without significantly degrading voiceband services on that loop, as defined in § 51.233, and that there is no adjacent or alternative loop available that can be conditioned or to which the customer's voiceband service can be moved to enable line sharing.

(iii) If the relevant state commission concludes that a loop cannot be conditioned without significantly degrading the voiceband service, the incumbent LEC cannot then or subsequently condition that loop to provide advanced services to its own customers without first making available to any requesting carrier the high frequency portion of the newly-conditioned loop.

(6) *Digital loop carrier systems.* Incumbent LECs must provide to requesting carriers unbundled access to the high frequency portion of the loop at the remote terminal as well as the central office, pursuant to § 51.319(a)(2) and § 51.319(h)(1).

(7) *Maintenance, repair, and testing.* (i) Incumbent LECs must provide, on a nondiscriminatory basis, physical loop test access points to requesting carriers

at the splitter, through a cross-connection to the competitor's collocation space, or through a standardized interface, such as an intermediate distribution frame or a test access server, for the purposes of loop testing, maintenance, and repair activities.

(ii) An incumbent seeking to utilize an alternative physical access methodology may request approval to do so from the relevant state commission, but must show that the proposed alternative method is reasonable, nondiscriminatory, and will not disadvantage a requesting carrier's ability to perform loop or service testing maintenance or repair.

Specifically, this document substitutes Channel 293A for Channel 294C at Muenster, Texas, and modifies the license of Station KXGM-FM to specify operation on Channel 294C. In order to accommodate Channel 294C at Muenster, it substitutes Channel 294C for Channel 296C1 at Granbury, Texas, reallots Channel 296C1 to Benbrook, Texas, and modifies the license of Station KDXT to specify operation on Channel 296C1 at Benbrook. It also substitutes Channel 294C2 for Channel 282C2 at Detroit, Texas, and substitutes Channel 284A for Channel 272A at Antlers, Oklahoma. It also substitutes Channel 295A for Channel 296A at McKinney, Texas, reallots Channel 296A to Campbell, Texas, and modifies the license of Station KZDF to specify operation on Channel 296A at Campbell. It substitutes Channel 294A for Channel 296C3 at Lone Grove, Oklahoma, and modifies the license of Station KYNZ to specify operation on Channel 263C3. To accommodate Channel 263C3 at Lone Grove, it substitutes Channel 296C3 for Channel 292A at Durant, Oklahoma, and modifies the license of Station KLBC to specify operation on Channel 292A. In order to accommodate Channel 296A at Campbell, it substitutes Channel 296A for Channel 295A at Terrell, Texas, reallots Channel 295A to Kerens, Texas, and modifies the license of Station KZDL to specify operation on Channel 295A at Kerens. The Channel 296C1 allotment at Benbrook requires the substitution of Channel 296C3 for Channel 234C3 at Graham, Texas, and modification of the license of Station KWKQ to specify operation on Channel 234C3; the substitution of Channel 296C3 for Channel 272C3 at Coleman, Texas, and the modification of the license of Station KSTA-FM to specify operation on Channel 272C3; and the substitution of Channel 296A for Channel 277A at Waco, Texas, and the modification of the license of Station KWBU to specify operation on Channel 277A. In order to allot Channel 277A at Waco, it substitutes Channel 277C3 for

Channel 281C3 at Clifton, Texas, and modifies the license of Station KWOW to specify operation on Channel 281C3. In order to allot Channel 281C3 to Clifton, it substitutes Channel 281C1 for Channel 245C1 at Brownwood, Texas, and modifies the license of Station KXYL-FM to specify operation on Channel 245C1. In order to allot Channel 245C1 to Brownwood, it substitutes Channel 246A for Channel 291A at San Saba, Texas, and modifies the license of Station KBAL-FM to specify operation on Channel 291A. It also substitutes Channel 277C3 for Channel 277C at Commerce, Texas, reallots Channel 277C to Allen, Texas, and modifies the license of Station KEMM to specify operation on Channel 277C at Allen. In order to allot Channel 277C to Allen, it substitutes Channel 277C1 for Channel 272C1 at Wichita Falls, Texas, and modifies the license of Station KWFS to specify operation on Channel 272C1; and substitutes Channel 276C2 for Channel 271A at Atoka, Oklahoma, and modifies the license of Station KHKC to specify operation on Channel 298A. In order to allot Channel 272C1 to Wichita Falls, it substitutes Channel 273A for Channel 280A at Wichita Falls, Texas, and modifies the license of Station KQXC to specify operation on Channel 280; substitutes Channel 272A for Channel 276A at Vernon, Texas, and modifies the license of Station KVWC to specify operation on Channel 276A; substitutes Channel 272A for Channel 246A at Duncan, Oklahoma, and modifies the license of Station KKEN to specify operation on Channel 246A. In order to allot Channel 246A to Duncan, it substitutes Channel 246A for Channel 287A at Comanche, Oklahoma, and modifies the license of Station KDDQ to specify operation on Channel 287A. In order to allot Channel 287A to Comanche, it substitutes Channel 284C for Channel 284C1 at Burkburnett, Texas, and modifies the license of Station KYYI to specify operation on Channel 284C1. In order to allot Channel 280A to Wichita Falls, it substitutes Channel 279C1 for Channel 278C at Anadarko, Oklahoma, and modifies the license of Station KPRT to specify operation on Channel 278C. In order to allot Channel 278C to Anadarko, it substitutes Channel 278C1 for Channel 248C2 at Alva, Oklahoma; and substitutes Channel 278C3 for Channel 224A at Dickson, Oklahoma. It also substitutes Channel 237A for Channel 238A at Jacksboro, TX, and modifies the construction permit of Station KJKB to specify operation on Channel 238A. In order to allot Channel 238A to Jacksboro, it substitutes

Channel 238C for Channel 246C1 at Haskell, Texas, and modifies the license of Station KVRP to specify operation on Channel 246C1. In order to allot Channel 246C1 to Haskell, it substitutes Channel 246A for Channel 255A at Snyder, Texas, and substitutes Channel 246A for Channel 245A at Eldorado, Oklahoma. *See* 63 FR 63016, November 10, 1998. National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 991228352-0012-02; I.D. 040500A]

Fisheries of the Exclusive Economic Zone Off Alaska; Rock Sole by Catcher Vessels Using Trawl Gear in the Bering Sea and Aleutian Islands

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is closing directed fishing for rock sole by catcher vessels that are non-exempt under the American Fisheries Act (AFA) in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the interim 2000 BSAI AFA catcher vessel sideboard amount of rock sole.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), April 6, 2000, until 2400 hrs, A.l.t., December 31, 2000.

FOR FURTHER INFORMATION CONTACT:

Andrew Smoker, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The amount of the interim 2000 BSAI AFA catcher vessel rock sole sideboard harvest limit was established as 2,921 metric tons (mt) in accordance with § 679.63 (b)(1)(ii)(A) by the Emergency Interim Rule to Implement Major Provisions of the American Fisheries Act (65 FR 4520, January 28, 2000).

In accordance with § 679.20(d)(1)(iv), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the sideboard harvest limit of rock sole for non-exempt AFA catcher vessels will be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 2,500 mt, and is setting aside the remaining 421 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance will soon be reached. Consequently, NMFS is closing directed fishing for rock sole by non-exempt AFA catcher vessels in the BSAI.

Maximum retainable bycatch amounts may be found in the regulations at § 679.20(e) and (f).
