Title: NESHAP for Glass Manufacturing Plants (Renewal).

ICR Numbers: EPA ICR Number 1131.10, OMB Control Number 2060-0054.

ICR Status: This ICR is scheduled to expire on December 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The New Source Performance Standards (NSPS) for Glass Manufacturing Plants (40 CFR part 60, subpart CC) were promulgated on October 7, 1980 and amended on October 17, 2000. The provisions of this subpart apply to each glass manufacturing plant that either commenced construction or modification after June 15, 1979.

Owners or operators of subpart CC facilities are required to comply with reporting and recordkeeping requirements, and maintain records of specific information needed by EPA to determine if compliance has been achieved. Sources are required to submit semiannual reports of excess emissions. These notifications, reports, and records are essential in determining compliance; and, in general, are required of all sources subject to NSPS.

Notifications are to inform the Agency or delegated authority when a source becomes subject to the standard. The reviewing authority may then inspect the source to ensure that the pollution control devices are properly installed and operating and that the standards are being met. Performance test reports are required as these are the Agency's records of a sources' initial capability to comply with the emission standards and to serve as a record of the operating conditions under which compliance are to be achieved. The information generated by monitoring, recordkeeping, and reporting requirements described in this ICR are used by the Agency to
