The original permit (No. 14241), issued on July 15, 2009 (74 FR 36668) authorized conduct research on cetacean behavior, sound production, and responses to sound through July 31, 2014. The research methods include tagging marine mammals with an advanced digital sound recording tag that records the acoustic stimuli an animal hears and measures vocalization, behavior, and physiological parameters. Research also involves conducting sound playbacks in a carefully controlled manner and measuring

animals' responses. The principal study species are beaked whales, especially Cuvier's beaked whale (*Ziphius cavirostris*), and large delphinids such as long-finned pilot whales (*Globicephala melas*), although other small cetacean species may also be studied. The locations for the field work are the Mediterranean Sea, waters off of the mid-Atlantic United States, and Cape Cod Bay. Amendments to the original permit added cetacean species, modified methodology protocols, and added study locations. The minor amendment (No. 14241-05) extends the duration of the permit through July 31, 2015, but does not change any other terms or conditions of the permit.
