SUPPLEMENTARY INFORMATION: The BLM completed the Pinedale RMP in 2008. The purpose of the RMP amendment is to analyze the closure of approximately 5,120 acres to oil and gas leasing in Sublette County, Wyoming. The State of Wyoming has requested that this land be made unavailable for future mineral leasing and development due to its location immediately adjacent to United States Forest Service lands withdrawn from leasing by the Wyoming Range Legacy Act of 2009 and private split-estate lands that the 2008 Pinedale RMP determined not to be available for leasing. In accordance with 43 CFR 1610.5-5, an RMP may be changed through an amendment. An amendment may be initiated by the need to consider monitoring and evaluation findings, new data, new or revised policy, a change in circumstances or a proposed action that may result in a change in the scope of resource uses or a change in the terms, conditions and decisions of the approved plan.

The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the planning process. The BLM will use an interdisciplinary approach to develop
