

IIC would not approve an information collection that is duplicative of the witness/passenger questionnaire when the NTSB has already sought feedback on the questionnaire.

In general, the NTSB believes the questionnaires will impose a minimal burden on respondents: the NTSB estimates that each respondent will spend approximately 30 to 45 minutes in completing each questionnaire. The NTSB estimates that a maximum of 650 respondents per year would complete a questionnaire. Although the NTSB may distribute questionnaires to perhaps as many as 1,300 people, historic response rates indicate only 50 percent of the questionnaires will be returned completed. However, the NTSB again notes this number will vary, given the unpredictable nature of the frequency of transportation events.

D. Request for Comments

In accordance with 44 U.S.C. 3506(c)(2)(A), the NTSB seeks feedback from the public concerning this proposed plan for information collection. In particular, the NTSB asks the public to evaluate whether the proposed collection of information is necessary; to assess the accuracy of the NTSB's burden estimate; to comment on how to enhance the quality, utility, and clarity of the information to be collected; and to comment on how the NTSB might minimize the burden of the collection of information.

The NTSB will carefully consider all feedback it receives in response to this notice. As described above, obtaining the information the NTSB seeks on these questionnaires in a timely manner is important to NTSB investigations; therefore, obtaining approval from OIRA for these collections of information on a generic basis is a priority for the NTSB.

Chairman.
