

Americans, which shall include members of agencies that implement policies that impact immigrant communities.

In response to E.O. 14012, on July 2, 2021, the Secretaries of Homeland Security and Veterans Affairs announced a new joint initiative, the Immigrant Military Members and Veterans Initiative (IMMVI), to support our Nation's noncitizen service members, veterans, and their immediate family members and directed their departments to identify and prioritize the return of military service members, veterans, and their immediate family members who were unjustly removed from the United States and ensure that they receive the benefits to which they may be entitled.

The information to be collected for self-disclosure would include: A-Number, USCIS Receipt Numbers (if any), Name, Date of Birth, Country of Residence, Email, Phone Number, Branch and Dates of Military Service, Address, reason for requesting assistance, and Name and Contact Information of Representative, if applicable.

To carry out the goals of IMMVI, DHS is proposing this new data collection to offer noncitizen current and former military members and their families an opportunity to seek assistance from DHS. The purpose of this information collection is to achieve efficiencies in making contact with individuals, better understand their needs, and track and report the number and types of inquiries received. This information will assist DHS in improving access to immigration services and VA health benefits. DHS plans to collect relevant information to provide assistance at the point the individual submits this information on the new website for benefits and immigration assistance. The information collected through this public facing webform will be voluntarily provided by the users. A new webform hosted on *dhs.gov* will be established to allow for individuals to submit the necessary information to make contact with the government to seek assistance. Additionally, the government provides an email address for those who are not able to access the webform. The government will then reach out to the individual to provide them with the necessary information needed to request immigration or VA benefits. The progress of the inquiries will be tracked in a DHS case management system.

The non-citizen current or former servicemember or their family member will submit their information through a webform on *dhs.gov*. The information will be transmitted to government

systems and shared with the cooperating DHS components and agencies assisting the former military members and their families. All information related to the individual's request and action taken by the government will be noted in the case management system for tracking and appropriate follow through and action. If the collection of information impacts small businesses or other small entities (Item 5 of OMB Form 83–I), describe any methods used to minimize burden.

All information received through the DHS website will be reviewed by trained DHS federal staff assigned to IMMVI and stored in a DHS case management system. No information will be shared with other agencies without the appropriate privacy releases from the individuals accessing the portal. All information received through the portal and any actions taken in response to the information collected will be stored in a DHS case management system.

This is a new information collection request.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite

the public to comment on applications for permits under section 10(a)(1)(A) of the Endangered Species Act, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The requested permits would allow the applicants to conduct activities intended to promote recovery of species that are listed as endangered or threatened under the ESA.

Background

The Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), prohibits certain activities with endangered and threatened species unless authorized by a Federal permit. The ESA and our implementing regulations in part 17 of title 50 of the Code of Federal Regulations (CFR)

provide for the issuance of such permits and require that we invite public comment before issuing permits for activities involving endangered species.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. Our regulations implementing section 10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild. The ESA requires that we invite public comment before issuing these permits. Accordingly, we invite local, State, and Federal agencies; Tribes; and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies.
