

whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

**Abstract:** This Information Collection Request (ICR) seeks authorization for tribes to demonstrate their eligibility to be treated in the same manner as states under the Clean Air Act (CAA) and to submit applications to implement a CAA program. This ICR extends the collection period of information for determining eligibility, which expires August 31, 2014. The ICR maintains the estimates of burden costs for tribes in completing a CAA application.

The program regulation provides for Indian tribes, if they so choose, to assume responsibility for the development and implementation of CAA programs. The regulation, Indian Tribes: Air Quality Planning and Management (Tribal Authority Rule [TAR] 40 CFR parts 9, 35, 49, 50 and 81) sets forth how tribes may seek authority to implement their own air quality planning and management programs. The rule establishes: (1) Which CAA provisions Indian tribes may seek authority to implement, (2) what requirements the tribes must meet when seeking such authorization, and (3) what Federal financial assistance may be available to help tribes establish and manage their air quality programs. The TAR provides tribes the authority to administer air quality programs over all air resources, including non-Indian owned fee lands, within the exterior boundaries of a reservation and other areas over which the tribe can demonstrate jurisdiction. An Indian tribe that takes responsibility for a CAA program would essentially be treated in the same way as a state would be treated for that program.

**Respondents/affected entities:** States, locals, Indian tribes.

**Respondent's obligation to respond:** Voluntary, required to obtain or retain a benefit (Tribal Authority Rule [TAR] 40 CFR parts 9, 35, 49, 50 and 81).

**Estimated number of respondents:** 8.  
**Frequency of response:** One time applications.

**Total estimated burden:** 320 hours (per year). Burden is defined at 5 CFR 1320.03(b).

**Total estimated cost:** \$18,896.00 (per year), includes \$0 annualized capital or operation & maintenance costs.

**Changes in Estimates:** There is no change of hours in the total estimated respondent burden compared with the ICR currently approved by OMB.

Dated: March 20, 2014.

### SUPPLEMENTARY INFORMATION:

#### I. Information About the Project/Document

EPA's draft ROE 2014 is a comprehensive source of scientific indicators that describe the trends in the nation's environmental and human health condition. The indicators help to answer important questions for EPA about the current status and historical trends in U.S. air, water, land, human health, ecological systems, and aspects of sustainability at the national and regional levels. These indicators are based on data collected by the EPA, other federal and state agencies, and non-governmental organizations and meet high standards for data quality, objectivity, and utility. The ROE reports status and trends; it does not analyze or diagnose the reasons for, and relationships between, trends in stressors and environmental and health outcomes.

Since its earliest release in 2003, the ROE has undergone periodic updates and restructurings. The latest version features several significant changes, the most notable being that the draft ROE 2014 is fully online, allowing it to be more interactive and accessible than ever. Users can customize graphics and pan and zoom on maps. For certain

indicators, users can now choose to view statistical information about the data by simply clicking display options. Additionally, new indicators fill information gaps which previously lacked reliable, long-term data. A new conceptual framework and sustainability theme have also been added.
