Background

On January 14, 2015, the Department of Education (Department) published in the **Federal Register** (80 FR 1900) a notice inviting applications for five video description and captioning projects for fiscal year (FY) 2015 under the Educational Technology, Media, and Materials program, authorized under sections 674 and 681(d) of the Individuals with Disabilities Education Act (IDEA).

The purpose of the video description and captioning projects is to improve the learning opportunities for children with disabilities by providing access to television programming through highquality video description and captioning. These projects support access to widely available television programs that are appropriate for use in the classroom setting and are not otherwise required to be captioned or described by the Federal Communications Commission (FCC). A table listing the FY 2015 video description and captioning projects follows.

The Office of Special Education Programs (OSEP) also funds one project under CFDA 84.327N, Educational Technology, Media, and Materials for Individuals with Disabilities-Captioned and Described Educational Media, the Center for the Described and Captioned Media Program (DCMP; 84.327N). The purpose of the DCMP is to establish and operate an Accessible Learning Center that would oversee the selection, acquisition, captioning, video description, and distribution of educational media through a free loan service for eligible users. The video description and captioning projects are required to use the DCMP's portal as a repository so that eligible users can easily access the video described and captioned media. The DCMP's project period started on October 1, 2016, and will end on September 30, 2021.

Waivers and Extensions

OSEP proposes to extend the five video description and captioning projects to align the projects' end dates with that of the DCMP, which will receive its final year of funding in FY 2020 and end on September 30, 2021. OSEP does not believe that it would be in the public interest to run a competition for CFDA 84.327C in FY 2020. Aligning the ends of these project periods would allow the Department to better coordinate the Description and Captioning program. Aligning the video description and captioning projects' periods with the DCMP's project period also would improve coordination across projects, allow for more efficient use of the funding available to support these activities, and ensure easier access to a wider range and increasing numbers of captioned and described educational media and programming.

For these reasons, the Secretary proposes to waive the requirements in 34 CFR 75.250, which prohibit project periods exceeding five years, as well as the requirements in 34 CFR 75.261(a) and (c)(2), which allow the extension of a project period only if the extension does not involve the obligation of additional Federal funds. The waiver would allow the Department to issue a one-time FY 2020 continuation award to each of the five currently funded 84.327C projects.

Any activities carried out during the year of this continuation award must be consistent with, or a logical extension of, the scope, goals, and objectives of the

grantees' applications as approved in the FY 2015 competition. The requirements for continuation awards are set forth in 34 CFR 75.253.

Regulatory Flexibility Act Certification

The Secretary certifies that the proposed waiver and extension of the project period would not have a significant economic impact on a substantial number of small entities. The only entities that would be affected by the proposed waiver and extension of the project period are the current grantees.

The Secretary certifies that the proposed waiver and extension would not have a significant economic impact on these entities, because the extension of an existing project period imposes minimal compliance costs, and the activities required to support the additional year of funding would not impose additional regulatory burdens or require unnecessary Federal supervision.

Paperwork Reduction Act of 1995

This notice of proposed waiver and extension of the project period does not contain any information collection requirements.

Intergovernmental Review
