

47 CFR 25.264(d)—No later than nine months prior to launch, each 17/24 GHz BSS space station applicant or authorization holder must provide pfd calculations based upon the measured transmitting antenna off-axis gain information that is submitted in accordance with paragraph (c) of this section as follows:

(1) The pfd calculations must be provided:

(i) At the location of all prior-filed U.S. DBS space stations as defined in paragraph (b)(1) of this section, where the applicant's pfd level in the 17.3–17.8 GHz band exceeds the coordination trigger of –117 dBW/m[FN2]/100 kHz; and

(ii) At the location of any subsequently-filed DBS U.S. DBS space station where the applicant's pfd level in the 17.3–17.8 GHz band exceeds the coordination trigger of –117 dBW/m[FN2]/100 kHz. In this rule, the term subsequently-filed U.S. DBS space station refers to any Direct Broadcast Satellite service space station application that was filed with the Commission (or authorization granted by the Commission) after the 17/24 GHz BSS operator submitted the predicted data required by paragraphs (a)–(b) of this section, but prior to the time the 17/24 GHz BSS operator submitted the measured data required in this paragraph. Subsequently-filed U.S. DBS space stations may include foreign-licensed DBS space stations seeking authority to serve the United States market. The term does not include any applications (or authorizations) that have been denied, dismissed, or are otherwise no longer valid, nor does it include foreign-licensed DBS space stations that have not filed applications with the Commission for market access in the United States.

(2) The pfd calculations must take into account the maximum longitudinal station-keeping tolerance, orbital inclination and orbital eccentricity of both the 17/24 GHz BSS and DBS space stations, and must:

(i) Identify each prior-filed U.S. DBS space station at whose location the coordination threshold pfd level of –117 dBW/m[FN2]/100 kHz is exceeded; and

(ii) Demonstrate the extent to which the applicant's or licensee's transmissions in the 17.3–17.8 GHz band exceed the threshold pfd level of –117 dBW/m[FN2]/100 kHz at those prior-filed U.S. DBS space station locations.

47 CFR 25.264(f)—The 17/24 GHz BSS applicant or licensee must modify its license, or amend its application, as

appropriate, based upon new information:

(1) If the pfd levels submitted in accordance with paragraph (d) of this section are in excess of those submitted in accordance with paragraph (b) of this section at the location of any prior-filed or subsequently-filed U.S. DBS space station as defined in paragraphs (b)(1) and (d)(1) of this section, or

(2) If the 17/24 GHz BSS operator adjusts its operating parameters in accordance with paragraphs (e)(1)(ii) or (e)(2)(ii) of this section.

OMB approved these information collection requirements on November 17, 2011.

Policies To Promote Rural Radio Service and To Streamline Allotment and Assignment Procedures; Petition for Reconsideration of Action of Rulemaking Proceeding

AGENCY: Federal Communications Commission.

ACTION: Final rule; petition for reconsideration.

SUMMARY: In this document, Petitions for Reconsideration (Petitions) have been filed in the Commission's Rulemaking proceeding concerning new procedures for evaluating mutually exclusive proposals for radio service, as well as for applications to change a station's community of license. The Commission adopted these procedural changes to promote the initiation and retention of radio service in and to smaller communities and rural areas.

DATES: Oppositions to the Petitions must be filed by January 5, 2012. Replies to an opposition must be filed January 17, 2012.

ADDRESSES: Federal Communications Commission, 445 12th Street SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Peter Doyle or Thomas Nessinger, Media Bureau, (202) 418–2700.

SUPPLEMENTARY INFORMATION: This is a summary of Commission's document, Report No. 2940, released December 12, 2011. The full text of this document is
