On September 4, 2012, FFP Project 66, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project located on the Mississippi River, near Fairview, in Concordia Parish, Louisiana, and Adams County, Mississippi. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Saint Catherine Bend hydrokinetic project would consist of the following: (1) Up to 6,382 SmarTurbine generating units installed in arrays on the bottom of the river; (2) the total capacity of the installation would be up to 255,280 kilowatts; (3) flexible cables would convey each arrays power to a metering station; and

(4) a transmission line would interconnect with the power grid. The proposed project would have an average annual generation of 580,564,000 kilowatt-hours, which would be sold to a local utility.
