SUMMARY: This document provides the public with notice that, on February 15, 2024, the Central Florida Rail Corridor (CFRC) submitted a request for amendment (RFA) to its FRA-certified positive train control (PTC) system in order to temporarily disable its PTC system between Milepost (MP) 749.60 and MP 755.4 to perform infrastructure upgrades to better facilitate vehicular travel across a crossing. As this RFA may involve a request for FRA's approval of proposed material modifications to an FRA-certified PTC system, FRA is publishing this notice and inviting public comment on CFRC's RFA to its PTC system.

DATES: FRA will consider comments received by March 18, 2024. FRA may consider comments received after that date to the extent practicable and without delaying implementation of valuable or necessary modifications to a PTC system.

ADDRESSES:

Comments: Comments may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and the applicable docket number. The relevant PTC docket number for this host railroad is Docket No. FRA–2011–0104. For convenience, all active PTC dockets are hyperlinked on FRA's website at <https://railroads.dot.gov/research-development/program-areas/train-control/ptc/railroads-ptc-dockets>. SUPPLEMENTARY INFORMATION: In general, title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad's PTC system

complies with title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC system or the associated FRA-approved PTC Safety Plan (PTCSP), a host railroad must submit, and obtain FRA's approval of, an RFA to its PTC system or PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA's regulations provide that the FRA will publish a notice in the **Federal Register** and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that, on February 15, 2024, CFRC submitted an RFA to its PTCSP for its Interoperable Electronic Train Management System (I–ETMS), which seeks FRA's approval for a temporary outage during infrastructure upgrades to better facilitate vehicular travel across a crossing. That RFA is available in Docket No. FRA–2011–0104.

Interested parties are invited to comment on CFRC's RFA by submitting written comments or data. During FRA's review of CFRC's RFA, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. *See* 49 CFR 236.1021; *see also* 49 CFR 236.1011(e). Under 49 CFR 236.1021, FRA maintains the authority to approve, approve with conditions, or deny a railroad's RFA at FRA's sole discretion.
