Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

AGENCY: National Marine Fisheries
Service (NMFS), National Oceanic and
Atmospheric Administration (NOAA),
Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional
Administrator for Sustainable Fisheries,
Northeast Region, NMFS, has made a
preliminary determination that the
subject exempted fishing permit (EFP)
application contains all the required
information and warrants further
consideration. Therefore, NMFS
announces that the Assistant Regional
Administrator proposes to recommend
that an EFP be issued that would allow
commercial fishing vessels to conduct
fishing operations that are otherwise
restricted by the regulations governing
the fisheries of the Northeastern United
States. Regulations under the
Magnuson-Stevens Fishery
Conservation and Management Act
require publication of this notification
to provide interested parties the
opportunity to comment on applications
for proposed EFPs.

DATES: Comments must be received on
or before September 8, 2009.

ADDRESSES: Comments may be
submitted by email to
NERO.EFP@noaa.gov. Written
comments should be sent to Patricia A.
Kurkul, Regional Administrator, NMFS,
Northeast Regional Office, 55 Great
Republic Drive, Gloucester, MA 01930.
Mark the outside of the envelope
"Comments on the SNE Flatfish Discard
Mortality EFP." Comments may also be
sent via facsimile (fax) to (978) 281-
9135.

FOR FURTHER INFORMATION CONTACT:

Specialist, (978) 281-9166, fax (978)

SUPPLEMENTARY INFORMATION: An EFP is
being requested for eight vessels
participating in the Southern New
England (SNE) Flatfish Discard
Mortality Study conducted by the
NOAA/University of Massachusetts
Dartmouth School for Marine Science
and Technology (SMAST) Cooperative
Marine Education and Research
program. The primary objective of this
study is to assess the effects of different
stressors on the mortality of flatfish
discarded in the SNE and Mid-Atlantic
trawl fisheries. The researchers would
conduct field and lab observations of
flatfish captured during regular
commercial fishing operations for Reflex
Action Mortality Predictors (RAMP)
under different stressors to assess the
discard mortality rates of five flatfish
species: SNE yellowtail flounder; SNE
winter flounder; summer flounder;
northern windowpane flounder; and
southern windowpane flounder. In
addition, the applicants would use the
results of their study to assess the use
of RAMP in estimating the mortality of
each species within the flatfish
complex.

The study would be conducted aboard
eight commercial fishing vessels in the
SNE and Mid-Atlantic mixed trawl
fishery beginning the date of issuance of
the EFP and continuing for a full year.
All vessels would utilize otter trawl gear
with gear configuration and mesh size
dictated by current fishery regulations.
NOAA/University of Massachusetts
technicians and/or commercial
fishermen would collect 100 fish of each
species per month, during regular
commercial fishing operations, for a
maximum catch of 6,000 fish over the
course of the 12-month study (Table 1).
Fish would be landed and transported
live to the SMAST seawater lab facility
for testing and would not be sold. The
applicants have requested an exemption
from NE multispecies possession
restrictions for SNE yellowtail flounder,
SNE winter flounder, and northern
windowpane flounder, specified at
§§ 648.86(g)(1), 648.86(n)(1), and
648.86(n)(2), respectively, in order to
land the live specimens in excess of
possession limits. The applicants have
also requested an exemption from NE
multispecies minimum fish sizes
specified at § 648.83 and the summer
flounder minimum fish size at
§ 648.103(a) in order to test a
representative sample of the age
composition of discarded flatfish.

TABLE 1: ESTIMATED SAMPLE SIZE

Species	#fish/month	#fish total
SNE Yellowtail Flounder	100	1200
SNE Winter Flounder	100	1200
Summer Flounder	100	1200
Northern Window- pane Floun- der	100	1200
Southern Window- pane Floun- der	100	1200

For the field-based portion of the
study, technicians would observe a
minimum of 100 fish of each species on
commercial fishing trips for RAMP
before they are discarded at-sea. The
applicants would require a temporary
exemption from the summer flounder
commercial minimum fish size
restriction at § 648.103(a), the NE
multispecies minimum fish size
restrictions at § 648.83, and the NE
multispecies possession restrictions at
§§ 648.86(g)(1), 648.86(n)(1), and
648.86(n)(2), for the time period when
trained technicians or crew are
sampling fish. To ensure that monthly
sampling is not disrupted, the
applicants have also requested vessels
be exempt from the summer flounder
closure specified at § 648.101(a) for the
purposes of collecting the 100 live
specimens of each species each month.

The applicants may request minor
modifications and extensions to the EFP
throughout the course of research. EFP
modifications and extensions may be
granted without further public notice if
they are deemed essential to facilitate
completion of the proposed research
and result in only a minimal change in
the scope or impacts of the initially
approved EFP request.

In accordance with NAO
Administrative Order 216-6, a
Categorical Exclusion or other
appropriate National Environmental
Policy Act document would be
completed prior to the issuance of the
EFP. Further review and consultation
may be necessary before a final
determination is made to issue the EFP.
After publication of this document in
the **Federal Register**, the EFP, if
approved, may become effective
following the public comment period.

On 6/19/2009 (74 FR 29187-29189) and 6/26/2009 (74 FR 30531-30532), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed additions and deletion to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the products and services and impact of

the additions on the current or most recent contractors, the Committee has determined that the products and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and services to the Government.

2. The action will result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the products and services proposed for addition to the Procurement List.
