

Conformity Determination (DGCD) and Draft Section 106 Historic Resources Report will be available for public review beginning January 21, 2005. The DEIS details the proposed development of two new runways, terminal facilities, and related facilities at Washington Dulles International Airport (IAD), Dulles, Virginia.

The U.S. Army Corps of Engineers (USACE) is a cooperating federal agency, having jurisdiction by law because the proposed federal action has the potential for significant wetland impacts.

The DEIS presents the purpose and need for the proposed project, a comprehensive analysis of the alternatives to the proposed project, including the no-action alternative and potential environmental impacts associated with the proposed development of two new air carrier runways and related improvements at IAD.

In accordance with section 176(c) of the Federal Clean Air Act, FAA has assessed whether the air emissions that would result from FAA's action in approving the proposed projects conform with the State Implementation Plan (SIP). This assessment is contained in the Draft Air Quality General Conformity Determination.

Pursuant to the Coastal Zone Management Act of 1972, as amended, this project is being evaluated for consistency with the Virginia Coastal Program. Section 306(d)(14) of the CZMA requires public participation in the Federal consistency review process.

The Public Workshops/Hearings are also being conducted pursuant to MWAA's 1987 Programmatic Memorandum of Agreement with the Virginia State Historic Preservation Officer and the Advisory Council on Historic Preservation (as regards Section 106 of the National Historic Preservation Act of 1966—36 CFR 800).

The FAA encourages all interested parties to provide comments concerning the scope and content of the DEIS, Draft Air Quality General Conformity Determination and Draft Section 106 Historic Resources Report. Comments should be as specific as possible and address the analysis of potential environmental impacts and the adequacy of the proposed action or merits of alternatives and the mitigation being considered. Reviewers should organize their participation so that it is meaningful and makes the agencies aware of the viewer's interests and concerns using quotations and other specific references to the text of the DEIS and related documents. Matters that could have been raised with

specificity during the DEIS comment period may not be considered if they are raised later in the decision making process. This commenting procedure is intended to ensure that substantive comments and concerns are made available to the FAA in a timely manner so that the FAA has an opportunity to address them.

Comments from interested parties on the DEIS and related documents are encouraged and may be presented verbally or in writing at the Public Information Meetings and/or Public Hearings or may be submitted in writing to the FAA at the address listed in the section entitled **FOR FURTHER INFORMATION CONTACT**. The comment period will close on March 7, 2005.

Issued in Dulles, Virginia, on January 7, 2005.

Manager, Washington Airports District Office, Federal Aviation Administration.
