

(SWQMWM), which estimates and sums the workload involved in more than one hundred activities or tasks comprising a State water quality management program. Over twenty States contributed information about their activities that became the basis for the model. According to the SWQMWM, to meet section 305(b) and 303(d) reporting requirements the States will conduct: Watershed monitoring and characterization; modeling and analysis; development of a TMDL document for public review; public outreach; formal public participation; tracking; planning; legal support; etc. In general, respondents have conducted each of these reporting and record keeping activities for past section 305(b) and 303(d) reporting cycles and thus have staff and procedures in place to continue their section 305(b) and 303(d) reporting programs. The burden associated with these tasks is estimated in this ICR to include the total number of TMDLs that may be submitted during the period covered by this ICR.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are States, Territories and Tribes with Clean Water Act (CWA) responsibilities.

Respondent's obligation to respond: Mandatory: Integrated Water Quality Inventory Reports (Clean Water Act sections 305(b), 303(d), 314(a), and 106(e)).

Estimated number of respondents: 59 (total).

Frequency of response: Biennial.

Total estimated burden: 3,740,017 (per year) hours. Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$203,728,300 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in Estimates: There is no change of hours in the total estimated respondent burden compared with the ICR currently approved by OMB, published on August 31, 2012. EPA is currently designing the Water Quality Framework, which is a new way of integrating EPA's data and information systems to more effectively support reporting and tracking water quality protection and restoration actions. The Framework will streamline water quality assessment and reporting by reducing transactions associated with paper copy reviews and increasing electronic data exchange. The Framework is in line with EPA's E-Enterprise Initiative, which seeks to assess and reformulate EPA's business process to reduce burden through the improved use of technology. EPA expects that the reporting burden will

decrease and will revise the ICR burden after the new information system is implemented for the 2018 reporting cycle.
