39 CFR Part 111

Labeling List Updates

AGENCY: Postal Service™.

ACTION: Final rule.

SUMMARY: The Postal Service is amending *Mailing Standards of the*

United States Postal Service, Domestic Mail Manual (DMM®) in various sections to eliminate 3 labeling lists (L003, L011, and L801) and redirect those sortations to labeling list L002, L005 or L009, as applicable, to commence the first phase of moving to shape-based labeling lists. Additionally, all language referencing “ADC/RPDC” will be revised to read as “ADC” in support of the ongoing realignment initiatives.

DATES: *Effective:* January 19, 2025.

FOR FURTHER INFORMATION CONTACT: Dale Kennedy at (202) 268–6592 or Doriane Harley at (202) 268–2537.

SUPPLEMENTARY INFORMATION: Shape-based mail and package processing is a fundamental premise of the Plant/Transportation Network Redesign underway in support of the 10-year Delivering For America plan. Deficiencies in the current labeling list framework offer the opportunity to align external (Commercial) mail preparation and entry as well as internal processing steps with a new shape-based approach to labeling lists.

In various sections, the DMM will continue to reference the AADC sort for labeling list L005 until a later date. Although the container label created using labeling list L005 will reflect SCF destination, mailpieces will receive SCF pricing as per the postage statement, when applicable.

The Postal Service will extend mailers a grace period for compliance with the labeling list changes until April 1, 2025. From April 2 through May 31, 2025, mailers must request an exception from PCSC to use data from the eliminated labeling lists. Files and data for the eliminated labeling lists will no longer be available after 5/31/25.

The Postal Service believes that this change will provide numerous benefits to mailers by deleting redundant lists, aligning existing lists, and synchronizing commercial mail preparation and entry with the opening of new USPS processing/entry points (with fewer errors and re-work).

The Postal Service adopts the described changes to *Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)*, incorporated by reference in the *Code of Federal Regulations*.

We will publish an appropriate amendment to 39 CFR part 111 to reflect these changes.

For bundles of flat-size mailpieces or bundles of nonstandard parcels on pallets, after preparing all possible pallets under 8.5.2a, when 250 or more pounds of bundles remain for an ADC (Periodicals) or for an NDC/ASF/RPDC (USPS Marketing Mail, Parcel Select, and Package Services), mailers must prepare the ADC/RPDC or NDC/ASF/RPDC pallet, as applicable for the class of mail. Exception: If no ADC or NDC/ASF/RPDC pallets are in a mailing and 250 or more pounds remain for an SCF/LPC (letters, flats)/RPDC (parcels), mailers must prepare the SCF/LPC (letters, flats)/RPDC (parcels) pallet.

c. Bundles that cannot be placed on an ADC, NDC/ASF/RPDC, or SCF/LPC (letters, flats)/RPDC (parcels) pallet may be placed on mixed ADC pallets if allowed by the specific standards for the class and shape of mail, or be placed in sacks or flat trays (when applicable) (see 8.9.1).

8.12.1 Basic Standards

The following apply:
[Revise items 8.12.1(a) through (c) to read as follows:]

a. Bundle reallocation to protect the ADC pallet is an optional preparation method authorized for mailers using PAVE-certified presort software and may be used to create pallets under the standards in 8.12.2 and 8.12.3. Presort software determines if mail for an ADC service area falls beyond the ADC level if all finer level pallets are prepared.

b. Reallocation is performed only when there is mail for the ADC service area that falls beyond the ADC pallet level (e.g., to sacks or flat trays).

c. Reallocate only the minimum number of bundles necessary to create an ADC pallet at the minimum required weight.

8.12.2 General Rules

Reallocation rules are as follows:
[Revise 8.12.2(a) to read as follows:]

a. Bundle preparation is not affected by the reallocation process. Reallocate only complete bundles and only the minimum number of bundles necessary to create an ADC pallet meeting the minimum pallet weight. [Revise the first sentence of 8.12.2(b) to read as follows:]

We proposed to approve this rule because we determined that it complies with the relevant CAA requirements. Our proposed action contains more information on the rule and our evaluation.

II. Public Comments and EPA Responses

The EPA’s proposed action provided a 30-day public comment period. During this period, we received five comments. Three of these comments were supportive of our proposed action, one was not germane to the action, and one stated that the rule submittal is not approvable. All the comments can be found in the docket for this rulemaking. We thank the commenters for their input. One of these commenters in support of the proposed action asked why there was no mention of California and COVID–19. FRAQMD Rule 7.15 was adopted and submitted to address the CAA section 185 fee program for Federal ozone nonattainment areas. Because COVID–19 does not bear on whether or not the submitted rule fulfills the requirements of section 185 of the CAA, we do not consider COVID–19 relevant to this rulemaking.

The comment in opposition to our proposed action was submitted from Air Law for All, Ltd., on behalf of the Center for Biological Diversity (the commenter from here on referred to as “ALFA” or “the commenter”). We have summarized below the substance of the comments from ALFA, identifying discrete points made by the commenter, and responding to each in turn.

Before responding to the issues raised by the commenter, we will first correct two factual misstatements in the comment letter. In the Background section of ALFA’s comment letter, the commenter states that “In 2012, EPA determined that the area had met the 1-hour standards by the applicable attainment date for those standards.” The reference cited was an EPA action on October 18, 2012 (77 FR 64036). In that action, the EPA determined that complete, quality-assured, and certified air quality data for the Sacramento Metro 1-hour ozone nonattainment area show continuous attainment for the 1-hour ozone national ambient air quality standards (NAAQS) since 2009. We would like to clarify that this clean data finding was not a determination that the area had attained the NAAQS by the

applicable attainment date, but instead a finding that the area had achieved attaining levels of air quality for the 2009–2011 period, which was after the applicable attainment date. The commenter also incorrectly stated, “For the 2008 8-hour standards, the applicable attainment date is December 31, 2027.” The applicable attainment date for the Sacramento Metro ozone nonattainment area for the 2008 8-hour ozone NAAQS is July 20, 2027. See 40 CFR 51.1103(a) Table 1, 77 FR 30160 (May 21, 2012) and 80 FR 12264 (March 6, 2015).

Comment #1: The commenter states that the EPA has not carried out its duty to determine whether the Sacramento Metro nonattainment area has attained the 1997 8-hour NAAQS by the June 15, 2019 attainment date. The commenter states that “[t]his information is germane to EPA’s action, as the failure to attain would trigger the ozone fee requirement, for which the public and the regulated community must receive notice.” Therefore, the commenter claims that “EPA’s proposal notice is insufficient, because it gives no notice of the legal consequences of EPA’s approval.”
