

2009, to be considered in the scoping process. Comments will be available electronically and accessible through ADAMS at <http://adamswebsearch.nrc.gov/dologin.htm>.

Participation in the scoping process for the supplement to the GEIS does not entitle participants to become parties to the proceeding to which the supplement to the GEIS relates. Matters related to participation in any hearing are outside the scope of matters to be discussed at this public meeting.

At the conclusion of the scoping process, the NRC will prepare a concise summary of the determination and conclusions reached, including the significant issues identified, and will send a copy of the summary to each participant in the scoping process. The summary will also be available for inspection in ADAMS at <http://adamswebsearch.nrc.gov/dologin.htm>. The staff will then prepare and issue for comment the draft supplement to the GEIS, which will be the subject of separate notices and separate public meetings. Copies will be available for public inspection at the above-mentioned addresses, and one copy per request will be provided free of charge. After receipt and consideration of the comments, the NRC will prepare a final supplement to the GEIS, which will also be available for public inspection.

Information about the proposed action, the supplement to the GEIS, and the scoping process may be obtained from Ms. Regner at the aforementioned telephone number or e-mail address.

SUPPLEMENTARY INFORMATION:

I. Introduction

By letter dated October 24, 2006, AREVA NP, Inc. (AREVA) requested the renewal of Special Nuclear Material License No. SNM-1227. Pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR), Section 2.106, the U.S. Nuclear Regulatory Commission (NRC) is providing notice that Special Nuclear Material License No. SNM-1227, which authorizes AREVA to possess and process enriched uranium up to a maximum of five weight percent uranium-235, for the manufacture of fuel assemblies for commercial nuclear power plants (both pressurized water reactors and boiling water reactors) at its fuel fabrication facility in Richland, Washington, has been renewed for a period of 40 years. AREVA's request for the proposed renewed license was previously noticed, and an opportunity to request a hearing provided, in the **Federal Register** on March 15, 2007 (72 FR 12202). A Notice of Availability of Environmental Assessment and Finding of No Significant Impact has been noticed in the **Federal Register** on April 3, 2009 (74 FR 15312).

This license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and NRC's rules and regulations as set forth in 10 CFR Chapter 1. Accordingly, this license was renewed on April 24, 2009, and is effective immediately.

II. Further Information

The NRC has prepared a Safety Evaluation Report (SER) that documents the information that was reviewed and the NRC's conclusion. In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," details with respect to this action, including the SER and accompanying documentation included in the license package, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents.
