

campus disability services office. At this time, this is the only database that provides systemic collection of information about campus-level, disability-related services, access, and activities at colleges and universities in the United States. The NCCSD survey asks all U.S. campuses to provide basic information about disability services, accessibility of campuses, and disability-related activities that may affect inclusion and the campus climate. The data is available to the public in an accessible and searchable database to assist prospective college students and their families in making informed decisions during the college search process. Because the database is public, researchers and policy makers are able to utilize the data to gather information about disability and higher education in systemic ways.
