## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[EPA-R06-OAR-2020-0363; FRL-10012-84-Region 6]

### Findings of Failure To Submit State Implementation Plans Required for Attainment of the 2010 1-Hour Primary Sulfur Dioxide (SO<sub>2</sub>) National Ambient Air Quality Standard (NAAQS)

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is taking final action to find that Texas has failed to submit State Implementation Plans (SIPs) to satisfy certain nonattainment area planning requirements of the Clean Air Act (CAA) for the 2010 1-hour primary Sulfur Dioxide (SO<sub>2</sub>) National Ambient Air Quality Standard (NAAQS). The purpose for the development and implementation of a nonattainment area SIP is to provide for attainment of the NAAQS as expeditiously as practicable following the designation of an area as nonattainment. This action establishes certain CAA deadlines for the EPA to impose sanctions if Texas does not submit a complete SIP for each nonattainment area addressing the outstanding requirements and for the EPA to promulgate a Federal Implementation Plan (FIP) to address any outstanding SIP requirements.

**DATES:** This action is effective on September 9, 2020.

#### SUPPLEMENTARY INFORMATION:

##### I. General Information

##### A. Notice and Comment Under the Administrative Procedure Act (APA)

Section 553 of the APA, Title 5 United States Code (U.S.C.) Section 553(b)(3)(B), provides that, when an

agency for good cause finds that notice and public procedures are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. The EPA has determined that there is good cause for making this final agency action without prior proposal and opportunity for comment because no significant EPA judgment is involved in making findings of failure to submit SIPs, or elements of SIPs, required by the CAA, where states have made no submission to meet the requirement. Thus, notice and public procedures are unnecessary to take this action. The EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(3)(B).

The EPA has established a docket for this action under Docket ID No. EPA-R06-OAR-2020-0363. Publicly available docket materials are available electronically through <http://www.regulations.gov>. Out of an abundance of caution for members of the public and our staff, the EPA Region 6 office will be closed to the public to reduce the risk of transmitting COVID-19. ## II. Background

In June 2010, the EPA promulgated a new 1-hour primary SO<sub>2</sub> NAAQS of 75 parts per billion (ppb), which is met when the 3-year average of the annual 99th percentile of daily maximum 1-hour average concentrations does not exceed 75 ppb, as determined in accordance with Appendix T of Title 40 Code of Federal Regulations (40 CFR) part 50. See 40 CFR 50.17(a)–(b). On June 30, 2016, the EPA signed the final action designating 61 areas as part of the second round of area designations for the 2010 SO<sub>2</sub> NAAQS (published at 81 FR 45039, July 12, 2016).<sup>1</sup> On November 29, 2016, the EPA supplemented its Round 2 designations by signing a supplemental final action that included nonattainment designations for the 2010 1-hour primary SO<sub>2</sub> NAAQS for portions of Rusk and Panola Counties, portions of Freestone and Anderson Counties, and a portion of Titus County (“Round 2 Supplement”) (81 FR 89870, December 13, 2016). These latter area designations had an effective date of January 12, 2017.

Areas designated as nonattainment for the SO<sub>2</sub> NAAQS are subject to the general nonattainment area planning requirements of CAA section 172 and to the SO<sub>2</sub>-specific planning requirements of subpart 5 of part D of Title I of the CAA (sections 191 and 192). All components of the SO<sub>2</sub> part D nonattainment area SIP, including the emissions inventory, attainment demonstration, reasonably available control measures (RACM) including reasonably available control technology (RACT), enforceable emission limitations and control measures, reasonable further progress (RFP) plan, nonattainment new source review (NNSR), and contingency measures, are

<sup>1</sup> The EPA completed its first round of initial area designations for the 2010 1-hour primary SO<sub>2</sub> NAAQS on August 5, 2013, with an effective date of October 4, 2013. Under a court order issued on March 2, 2015, the EPA is required to complete designations in three additional rounds of designations. The EPA must complete the final, Round 4 designations for the remaining undesignated areas of the country by no later than December 31, 2020. The findings in this document apply only to those areas that were designated as part of Round 2 on December 13, 2016, and where, as of signature of this action, Texas failed to submit required complete plans.
