#### Endangered and Threatened Wildlife and Plants; 90-Day Findings for Four Species

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of petition findings and initiation of a status review.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), announce 90-day findings on four petitions to add species to the List of Endangered and Threatened Wildlife under the Endangered Species Act of 1973, as amended (Act). Based on our review, we find that petitions to list the Arizona eryngo (*Eryngium sparganophyllum*) and giraffe (*Giraffa camelopardalis*) present substantial scientific or commercial information indicating that the petitioned actions may be warranted. Therefore, with the publication of this document, we announce that we plan to initiate reviews of the statuses of those species to determine if the petitioned actions are warranted. To ensure that the status reviews are comprehensive, we are requesting scientific and commercial data and other information regarding those species. Based on the status reviews, we will issue 12-month findings on the petitions, which will address whether or not the petitioned actions are warranted, in accordance with the Act. We also find that petitions to list the Refugio manzanita (*Arctostaphylos refugioensis*) and San Gabriel chestnut snail (*Glyptostoma gabrielense*) do not present substantial scientific or commercial information indicating that the petitioned actions may be warranted. Therefore, we are not initiating status reviews of these species in response to the petitions. We refer to these findings as “not substantial” petition findings.

**DATES:** These findings were made on April 26, 2019. As we commence work on the status reviews, we seek any new information concerning the statuses of, or threats to, the species or their habitats. Any information received during our work on the status reviews will be considered.
