SUPPLEMENTARY INFORMATION:

A. Background

Section 5(a) of the Consumer Product
 Safety Act, 15 U.S.C. 2054(a), requires
 the CPSC to collect information related
 to the causes and prevention of death,
 injury, and illness associated with
 consumer products. That section also
 requires the CPSC to conduct
 continuing studies and investigations of
 deaths, injuries, diseases, other health
 impairments, and economic losses
 resulting from accidents involving
 consumer products.

The CPSC obtains information about
 product-related deaths, injuries, and
 illnesses from a variety of sources,
 including newspapers, death
 certificates, consumer complaints, and
 medical facilities. In addition, the CPSC
 receives information via its internet
 website through forms reporting on
 product-related injuries or incidents.
 The CPSC also operates the National
 Electronic Injury Surveillance System
 (NEISS), which provides timely data on
 consumer product-related injuries
 treated in hospital emergency
 departments in the United States. The
 CPSC also uses the NEISS system to
 collect information on childhood
 poisonings, in accordance with the

Poison Prevention Packaging Act of
 1970.

From these sources, CPSC staff selects
 cases of interest for further
 investigation, by contacting persons
 who witnessed or were injured in
 incidents involving consumer products.
 These investigations are conducted on-
 site (face-to-face), by telephone, or by
 the internet. On-site investigations are
 usually made in cases where CPSC staff
 needs photographs of the incident site,
 the product involved, or detailed
 information about the incident. This
 information also can come from contact
 with state and local officials, including
 police, coroners, and fire investigators,
 and others with knowledge of the
 incident.

Through interagency agreements, the
 CPSC also uses the NEISS system to
 collect information on injuries for the
 Centers for Disease Control and
 Prevention (CDC) under the NEISS All-
 Injury Program (NEISS–AIP). The
 NEISS–AIP is a sub-sample of
 approximately two-thirds of the full
 NEISS sample. In addition to the
 standard data variables collected on all
 NEISS injuries, the NEISS–AIP collects
 additional variables on several studies
 for CDC (Adverse Drug Events, Assaults,
 Self-Inflicted Violence, and Work-
 Related Injuries) and one study on non-
 crash motor vehicle-related injuries for
 the National Highway and
 Transportation Safety Administration
 (NHTSA). Additional special study
 variables are collected for CDC in the
 full NEISS sample for firearm-related
 injuries.

The current NEISS probability sample
 was drawn and recruited in 1995–1996
 and implemented in 1997. Since then,
 several of the selected hospitals have
 stopped participating for reasons such
 as closures and mergers with other
 hospitals, and were replaced with other
 purposively-selected hospitals. While
 hospital weights are adjusted to account
 for changes in the population of
 hospitals over time, the current sample
 of hospitals participating in NEISS is
 being reviewed to assess their
 representativeness. The selection
 process may be revised in future years
 in order to strengthen the quality and
 representativeness of the estimates
 generated by the NEISS–AIP. CPSC has
 entered into a contract with Westat to
 perform an independent statistical
 assessment of the NEISS and NEISS–
 AIP samples under CPSC contract
 61320619F0134 with a period of
 performance of September 27, 2019,
 through September 26, 2020.
