Twain Resources, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On August 25, 2015, Twain Resources, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Scheelite Water Power Project (Scheelite Project or project) to be located along Pine Creek, near the City of Bishop, in Inyo County, California. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. The proposed project would consist of the following: (1) An intake receiving the water discharge from the Tungstar Redux Water Power Project; (2) an 18-inch-diameter, approximately 6,500-foot-long steel penstock, conveying water to; (3) a powerhouse containing a single 810-kilowatt impulse turbine and an 840 kilovolt-ampere generator; (4) a new substation at the powerhouse; (5) an approximately 600-foot-long, 12-kilovolt (kV) transmission line connecting the substation to a 12-kV California Edison-owned transmission line; and (6) appurtenant facilities. The estimated annual generation of the

Scheelite Project would be 4,860 megawatt-hours.
