

of 234.51 percent; and (4) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporter that supplied that non-PRC exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: September 10, 2012.

Paul Piquado,

Assistant Secretary for Import Administration.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

Quota allocations to groups of self-selecting permit holders (known as sector allocations) are increasingly being considered as a way to provide fishermen with greater control and flexibility in their fishing businesses while achieving efficiency gains. This new approach, which devolves substantial management responsibilities to groups of fishermen, represents a potential transformation in the relationship among permit holders as well as the relationship between permit holders and fisheries governance structures.

The NOAA National Marine Fisheries Service, Northeast Region expect that the success of sectors is likely to be shaped by the strength of the relationships between permit holders including their degree of trust and collaboration. We also expect that successful sectors will build norms and networks that enable collective action over time. The value of these relationships is commonly referred to in social and economic literature as social capital.

A baseline of existing social capital in the groundfish fishery in the Northeast Region was conducted in 2010 by the Gulf of Maine Research Institute. This survey, to be conducted twice over the next six years, will follow up on this earlier initiative and will enable researchers to measure the change in the types and strength of relationships between groundfish permit holders in the Northeast. This work will inform our understanding of how best to design collaborative management structures in support of sustainable fisheries in the region and nationally.

II. Method of Collection

Information will be collected via telephone interviews.
