

both external and internal breakwater structures were investigated to address the navigational safety and surge-related problems. However, concerns over impacts to adjacent surf breaks and biological resources were raised on several occasions, resulting in multiple delays in the planning process. Most recently, USACE and DOBOR re-initiated the project in 2009, with a focus on using stakeholder input and updated technical information to better define and inform the planning process. Through this effort, the decision to terminate the project was made based on careful consideration of the high cost associated with the proposed improvements (particularly in light of the current and foreseeable economic conditions), the regulatory constraints and mitigation requirements for unavoidable impacts to coral reefs, and community concerns regarding impacts to surf sites and natural resources.

A variety of technical studies and planning documents were produced in support of the project, including flushing studies, habitat surveys, and wave response modeling. The public may request copies of reports. The public will be notified of the termination of the project through a public notice, as well as a press release by the project sponsors. The press release will be published on the project Web site and posted at Maalaea Harbor.

DEPARTMENT OF EDUCATION

Proposed Priority; Technical Assistance on State Data Collection, Analysis, and Reporting—National IDEA Technical Assistance Center on Early Childhood Longitudinal Data Systems; CFDA Number 84.373Z

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice.

SUMMARY: The Assistant Secretary for Special Education and Rehabilitative Services proposes a priority under the Technical Assistance on State Data Collection program. The Assistant Secretary may use this priority for competitions in fiscal year (FY) 2012 and later years. We take this action to focus attention on an identified national need to provide technical assistance (TA) to States to improve their capacity to meet the Individuals with Disabilities Education Act (IDEA) data collection, analysis, and reporting requirements.

We propose to assist States in developing or enhancing statewide early childhood longitudinal data systems, by which we mean data systems that include child-level data for infants, toddlers, and young children with disabilities (birth through age 5) served through early childhood programs under IDEA Part C and Part B preschool programs. These statewide early childhood longitudinal data systems

would be part of a coordinated early learning data system, by which we mean data systems that vertically and horizontally link child, program, and workforce data elements related to children (birth through age 5). This TA will build States' capacity to report high-quality data to meet IDEA reporting requirements.
