The HTS codes applicable to the products subject to the requirements of this import restriction may be revised from time to time due to updates to the HTS by the International Trade Commission. Any such changes will be notified to the trade community in accordance with CBP's notification procedures. In addition, NMFS and CBP will actively monitor the border operations of the trade restriction and the certification requirement in the initial weeks of implementation to determine if the list of affected HTS codes can be adjusted to further minimize disruption to trade while maintaining compliance with the court order and this action.

Importers are advised to determine if other NMFS program requirements (e.g., Tuna Tracking and Verification Program, Seafood Import Monitoring Program) or other agency requirements

(e.g., Fish and Wildlife Service, State Department, Food and Drug Administration) have Automated Commercial Environment (ACE) data reporting requirements applicable to the HTS codes identified in Table 1 as subject to certification under the MMPA import provisions. In such cases, the other reporting requirements still pertain in addition to the Certification of Admissibility requirements imposed to effectuate the court order and this action.

Until such time as the import restrictions imposed by this action are lifted or revised, trade restrictions on these products harvested by gillnets in the UGC of Mexico within the vaquita's range or associated with the fisheries for which a comparability finding has been revoked will continue and Certification of Admissibility will be required for the HTS codes listed in this notice.

Background

NMFS has received three HGMPs for hatchery programs rearing and releasing Chinook salmon, coho salmon, and chum salmon in the Dungeness River basin, Washington. The three HGMPs were submitted pursuant to limit 6 of the Section 4(d) rule for salmon and steelhead. The hatchery programs are operated by Washington State Department of Fish and Wildlife in cooperation with the Jamestown S'Klallam Tribe.

The purpose of the hatchery programs is to contribute to the survival and recovery of Puget Sound Chinook Salmon, assist in developing information on exploitation rates, and support returns of coho salmon and chum salmon to the Dungeness River basin as well as contribute to the diet of Southern Resident Killer Whale (SRKW).
