SUPPLEMENTARY INFORMATION:

Description

The energy information collection submitted to OMB for review contains:

1. Collection of Information: FERC Form 2-A "Annual Report for Nonmajor Natural Gas Companies".

2. Sponsor: Federal Energy Regulatory Commission.

3. Control No.: OMB No. 1902-0030. The Commission is now requesting that OMB approve a three-year extension of the current expiration date, without any changes to the existing collection. There is an decrease in the reporting burden due to an adjustment in the number of entities who are now subject to the Commission's jurisdiction and as a result must submit this annual report. In addition, the availability of Form 2-A submission software for filers for the 2001 filing year, will the Commission believes, reduce the burden as respondents benefit from user support at the Commission and from filing the FERC Form 2-A electronically through the Commission's gateway on its web site. This is a mandatory information collection requirement.

4. Necessity of Collection of Information: Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing the provisions of the Natural Gas Act(NGA). Under the NGA the Commission may prescribe a system of accounts for jurisdictional companies, and after notice and hearing, may determine the accounts in which particular outlays and receipts will be entered, charged or credited. The FERC Form 2-A is designed to collect financial information from jurisdictional nonmajor natural gas companies. A "nonmajor" natural gas company is one that has combined gas sales for resale and has gas transported or stored for a fee that exceeds 200,000 Dth but which is less than 50 million Dth, in each of the three previous calendar years. Under the Form 2-A, the Commission investigates, collects and records data, and prescribes rules and regulations concerning accounts, records and memoranda as necessary to administer the NGA.

Respondent Description: The respondent universe currently comprises on average, 53 companies

subject to the Commission's jurisdiction.

6. Estimated Burden: 1,590 total burden hours, 53 respondents, 1 response annually, 30 hours per response (average).

7. Estimated Cost Burden to Respondents: 1,590 hours ÷ 2,080 hours per year × \$117,041 per year = \$ 89,469 average cost per respondent = \$1,688.

Statutory Authority: Sections 10 and 16 of the Natural Gas Act (NGA), 15 U.S.C. 717i-717o.

Secretary.

SUPPLEMENTARY INFORMATION:

Description

The energy information collection submitted to OMB for review contains:

1. Collection of Information: FERC Form 73 "Oil Pipelines Service Life Data".

2. Sponsor: Federal Energy Regulatory Commission.

3. Control No.: OMB No. 1902-0019. The Commission is now requesting that OMB approve a three-year extension of the current expiration date, without any changes to the existing collection. There is a decrease in the reporting burden due to an adjustment in the number of entities who are now subject to the Commission's jurisdiction and as a result must submit this report. This is a mandatory information collection requirement.

4. Necessity of Collection of Information: Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing the provisions of the Department of Energy Organization Act and the Interstate Commerce Act. Jurisdiction over oil pipelines, as it relates to the establishment of rates or charges for the transportation of oil by pipeline was transferred from the Interstate Commerce Commission to the Commission (FERC), pursuant to Sections 306 and 402 of the Department of Energy Organization Act (DOE Act). The Commission has authority over interstate oil pipelines as stated in the Interstate Commerce Act, § 6501 et. al. 49 U.S.C. A submission for new or changed depreciation rates is initiated by the oil pipeline company. As part of the information necessary for the subsequent investigation and review of the oil pipeline company's proposed depreciation rate, the pipeline companies are required to provide service life data as part of data submission if the proposed depreciation rates are based on remaining physical life calculations. This service life data is collected and submitted on FERC Form

73. The data is used by the Commission as input to several computer programs known collectively as the Depreciation Life Analysis System (DLAS) to assist in the selection of appropriate service lives and book depreciation rates. Book depreciation rates are used by oil pipeline companies to compute the depreciation portion of their operating expense which is a component of their cost of service which in turn is used to determine the transportation rate to assess customers. Commission staff's recommended book depreciation rates become legally binding when issued in an order by the Commission. These rates remain in effect until a subsequent review is requested and the outcome indicates that a modification is justified.

5. Respondent Description: The respondent universe currently comprises on average, 2 oil pipeline companies subject to the Commission's jurisdiction.

6. Estimated Burden: 80 total burden hours, 2 respondents, 1 response on occasion, 40 hours per response (average).

7. Estimated Cost Burden to Respondents: 80 hours ÷ 2,080 hours per year × \$117,041 per year = \$ 4,502 average cost per respondent = \$2,251.

Statutory Authority: Sections 306 and 402 of the DOE Act, § 7155 and 7172, 42 U.S.C.; the ICC Act § 6501 et. al. 49 U.S.C. and Executive Order No. 12009, 42 FR 46277 (September 13, 1977).
