

RFS industry will submit petitions for renewable fuel pathways to seek approval. The number in the respondent universe will decrease in all categories for the parties thus lessening the reporting burden for its members.

John Moses,

Director, Collection Strategies Division.

ENVIRONMENTAL PROTECTION AGENCY

Safe Drinking Water Act Sole Source Aquifer Program; Designation of Bainbridge Island, Washington as a Sole Source Aquifer

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final determination.

SUMMARY: Notice is hereby given that pursuant to Section 1424(e) of the Safe Drinking Water Act, the Administrator of the U.S. Environmental Protection Agency (EPA) has determined that the Bainbridge Island Aquifer System located in Kitsap County, Washington is the sole or principle source of drinking water for the citizens of Bainbridge Island and that this aquifer system, if contaminated would create a significant hazard to public health. As a result of this action, all Federal financially assisted projects constructed on Bainbridge Island will be subject to EPA review to ensure that these projects are designed and constructed so they do not

create a significant hazard to public health.

DATES: This determination shall be effective on March 29, 2013.

ADDRESSES: All documents relating to this determination are available for inspection by the public during normal business hours at the U.S. EPA Library, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101 between the hours of 9:00 a.m.-12:00 p.m. and 1:00-4:00 p.m. and at the Bainbridge Island library at 1270 Madison Avenue North, Bainbridge Island.

FOR FURTHER INFORMATION CONTACT:

Susan Eastman, EPA Region 10, Drinking Water Unit, by mail at the Seattle address given above, by telephone at (206) 553-6249, or by email at Eastman.susan@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1424(e) of the Safe Drinking Water Act (42 U.S.C. 300h3(e), Public Law 93-523 of December 16, 1974) states:

If the Administrator determines, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, could create a significant hazard to public health, he shall publish a notice of the determination in the **Federal Register**. After the publication of any such notice, no commitment for Federal financial assistance (through a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health, but a commitment for Federal financial assistance may, if authorized under another provision of law, be entered into to plan or design the project to assure that it will not so contaminate the aquifer.

On August 5, 2009, EPA received a petition from two citizens of Bainbridge Island requesting designation of the Bainbridge Island Aquifer System as a Sole Source Aquifer (SSA). On April 20, 2012, EPA published a notice in the *Bainbridge Islander* newspaper and mailed fact sheets to island residents which served to announce the public comment period. The public was permitted to submit comments and information on the petition from April 20 through June 4, 2012. Public comments received by EPA were generally in support of the designation.

II. Basis for Determination

EPA defines a sole or principle source aquifer as an aquifer or aquifer system which supplies at least 50 percent of the drinking water consumed in the area overlying the aquifer, and for which
