Background

On June 8, 2021, the FAA established the UAS BVLOS ARC to provide recommendations to the FAA on performance-based regulatory requirements to normalize safe, scalable, economically viable, and environmentally advantageous UAS BVLOS operations that are not under positive air traffic control (ATC). The UAS BVLOS ARC, comprised of stakeholders from 86 organizations, was tasked with providing recommendations that addressed requirements, and supported concepts of the following BVLOS operations: long-line linear infrastructure inspections, industrial aerial data gathering, small package delivery, and precision agriculture operations, including crop spraying.
