SUMMARY: This notice advises the public that the Bureau of Indian Affairs (BIA) as the lead Federal agency, with the Navajo Nation as a cooperating agency, intends to file a Draft Programmatic Environmental Impact Statement (DPEIS) with the Environmental Protection Agency for the proposed Navajo Nation Integrated Weed Management Plan (NNIWMP). This notice also announces that the DPEIS is now available for public review and comment and that a public hearing will be held to receive comments on the DPEIS.

SUPPLEMENTARY INFORMATION: The proposed Federal action is implementation of the NNIWMP. The BIA Navajo Regional Office prepared the NNIWMP to determine the most effective and appropriate methods to treat noxious and invasive weeds. The DPEIS discloses the direct, indirect, and cumulative environmental impacts of weed treatment techniques that would result from the Proposed Action and alternatives. The weed treatment techniques provide the BIA with the tools to implement an integrated approach to treating weeds on the Navajo Nation (Navajo Tribal Trust Lands, Navajo Indian Allotments, and Navajo Partitioned Lands).

The purpose of the NNIWMP is to prevent, eradicate, contain, and/or monitor 45 noxious weed species on the Navajo Nation including the Navajo Tribal trust lands, Navajo Indian allotments, and Navajo partitioned lands. The NNIWMP focuses on managing non-native invasive plant species using mechanical, manual, cultural, biological, and chemical weed treatment methods.

The following objectives were developed for the NNIWMP:

- Develop the best control techniques described for the target weed species in a planned, coordinated, and economically feasible program to limit the impact and spread of noxious and invasive weeds;
- Incorporate project successes and lessons learned from completed weed projects on the Navajo Nation when developing weed removal project proposals through adaptive management;
- Identify and prevent the expansion of existing infestations of target weed species, and quickly prevent the spread of new high priority weed species in the project area;
- Coordinate weed removal efforts with adjacent landowners, land managers, and/or Federal agencies to prevent the further spread of weed populations (e.g. State roads and Bureau of Land Management);
- Provide and promote economic opportunities to the Navajo people by improving rangeland productivity and potentially providing economic opportunities to remove noxious plant species; and
- Develop a public education program focusing on weed identification, prevention, and removal techniques for local communities and non-profit organizations.

The NNIWMP encompasses a 10-year period but will incorporate a plan

review after five years. Repeated treatments will be necessary for most species since seeds can be viable in soil for 10 or more years. Therefore, re-occurring weed treatments will be implemented until the desired management goal is reached.

Cooperating agencies for this NEPA process include: The Navajo Nation, Arizona Department of Transportation (ADOT), Utah Department of Transportation (UDOT), Navajo Nation Soil and Water Conservation Districts (SWCD), San Juan Soil and Water Conservation District, U.S. Department of Agriculture (USDA) Natural Resource Conservation Service (NRCS), the Bureau of Land Management, USDA Animal and Plant Health Inspection Service (APHIS) and the National Park Service. The BIA will seek to coordinate weed removal projects on adjacent lands managed by the above-mentioned agencies and neighboring areas managed by the Coconino National Forest and the Hopi Tribe.

BIA will use the DPEIS to make decisions on the implementation of the NNIWMP.

Directions for Submitting Comments: In accordance with the regulations for implementing NEPA, the BIA solicits public comment on the DPEIS. Comments on the DPEIS may be submitted in writing or by email to the address listed above in the **ADDRESSES** section of this notice. At the top of your letter or in the subject line of your email message, indicate that the comments are “Navajo Nation IWMP Draft EIS Comments.”

Public Hearings: To help protect the public and limit the spread of the COVID–19 virus, the BIA Navajo Regional Office will hold five virtual public hearings to facilitate public review and comment on the DPEIS. Members of the public can register for virtual public hearings at: <https://www.bia.gov/regional-offices/navajo/navajo-nation-integrated-weed-management-plan>.

After registering, participants will receive a confirmation email with instruction for joining the meeting.

SUPPLEMENTARY INFORMATION:

Background

The John D. Dingell, Jr. Conservation, Management, and Recreation Act (Pub. L. 116-9, March 2019) established the John S. McCain III 21st Century Conservation Service Corps Act (21 CSC Act) that amends and expands the Public Lands Corps Act. Contained

within the 21 CSC Act is the establishment of the Indian Youth Service Corps (IYSC) Program. The intent of the IYSC Program is to provide a direct benefit to members of federally recognized Indian Tribes or Alaska Native corporations. The IYSC Program will provide meaningful education, employment, and training opportunities to its participants through conservation projects on eligible service land, which includes public lands, Indian lands, and Hawaiian homelands.

While the Public Land Corps is established in the Departments of Agriculture and Commerce in addition to the Department of the Interior, the Act specifically charges the Secretary of the Interior with issuing guidelines for the management of the Indian Youth Service Corps (16 U.S.C. 1727b(c)).
