SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension of a currently approved information collection by the Office of National Marine Sanctuaries (ONMS). ONMS manages national marine sanctuaries pursuant to the purposes and policies of the National Marine Sanctuaries Act (NMSA, 16 U.S.C. 1431 *et seq.*).

National marine sanctuary regulations at 15 CFR part 922 list specific activities that are prohibited in national marine sanctuaries. These regulations also state that otherwise prohibited activities are permissible if a permit is issued by ONMS. Persons desiring a permit must submit an application, and anyone obtaining a permit is generally required to submit one or more reports on the activity allowed under the permit. The recordkeeping and reporting requirements at 15 CFR part 922 form the basis for this collection of information.

This information is required by ONMS to protect and manage sanctuary resources. The permit application collects information about the proposed activities, the methods proposed to be used, the potential effects to sanctuary resources, and information on the regulatory review criteria at 15 CFR part 922. ONMS uses this information to evaluate whether the proposed activities are consistent with the goals and objectives of the sanctuary and the intent of the NMSA.

Changes to this information collection include revisions to the permit application and instructions to improve clarity. The estimated number of permits issued per year also changed from 555 to 419. This is based on an estimated five additional permits from the designation of the Malloes Bay—Potomac River National Marine Sanctuary (84 FR 5073; Sept. 29, 2019) and a reduction of 141 permits per year because the Florida Keys National Marine Sanctuary is no longer issuing lionfish removal permits.

II. Method of Collection

Depending on the permit being requested, an application, reports, and telephone calls may be required from applicants. Applications and reports can be submitted via email, fax, or traditional mail. Applicants are encouraged to use electronic means to apply for permits and submit reports whenever possible.

SUPPLEMENTARY INFORMATION:

I. Abstract

The NMFS Southeast Region manages the U.S. fisheries in the exclusive economic zone of the Caribbean, Gulf of Mexico, and South Atlantic regions under multiple fishery management plans (FMPs). The regional fishery management councils prepare the FMPs pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). NMFS implements the regulations for the FMPs, which are located at 50 CFR part 622.

The recordkeeping and reporting regulations located at 50 CFR part 622 form the basis for the information collection requirements that are currently approved under OMB Control Number 0648–0358. NMFS proposes to extend the information collections under 0648–0358 without change. Regulations at 50 CFR part 622 require that all federally permitted fishing vessels must be marked with the official identification number or some other form of identification. A vessel's official number, under most regulations, must be displayed on the port and starboard sides of the deckhouse or hull, and on the weather deck. In addition, regulations for certain fisheries also require the display of the assigned color code for the vessel. The official number and color code identify each vessel and should be visible at distance from the sea and in the air. These markings provide law enforcement personnel with a means to monitor fishing, at-sea processing, and other related activities, as well as to ascertain whether the vessel's observed activities are in accordance with those authorized for that vessel. The identifying official number is used by NMFS, the United States Coast Guard, and other marine agencies in issuing violations, prosecutions, and other enforcement actions. Vessels that are authorized for particular fisheries are readily identified, gear violations are more readily prosecuted, and this allows for more cost-effective enforcement.

In addition to vessel marking, requirements that fishing gear be marked are essential to facilitate enforcement. The ability to link fishing gear to the vessel owner is crucial to enforcement of regulations issued under the authority of the Magnuson-Stevens
