

completion time data collected during the 2019 GSS survey cycle, which is ongoing.

TABLE 1—GSS ESTIMATED RESPONSE BURDEN

Category	Respondents (number of school coordinators)	Total burden (hours)
Total burden for 2020	911	18,424
Total burden for 2021	959	18,542
<i>GSS institutions</i>	916	18,469
<i>FFRDCs</i>	43	73
Total burden for 2022	921	18,514
Potential future methodological studies (across all 3 survey cycles)		1,000
Total estimated burden	2,791	56,480
Estimated average annual burden	930	18,827

Comments: As required by 5 CFR 1320.8(d), comments on the information collection activities as part of this study were solicited through publication of a 60-Day Notice in the **Federal Register** on April 6, 2020, at 85 FR 19169. NCSES received 2 comments.

NCSES received the first comment on 4 April 2020 from an economics professional association requesting a copy of the draft information collection request (ICR) including the survey instrument and supporting statement. NCSES informed the commenters that the ICR was currently undergoing internal review within NCSES with plans to submit it for public review in June and that the GSS would be largely unchanged from its current design.

NCSES received a second comment on 6 May 2020 from a group representing several organizations. The commenters requested that NCSES include measures of sexual orientation and gender identity on the GSS. NCSES informed the commenters that it shares their interest in improving federal data collections and providing reliable measures for important segments of the population. Furthermore, NCSES described its process for evaluating possible questionnaire additions, including the extensive experimentation involved and the time and resources required. Finally, NCSES informed the commenters that it is conducting research to evaluate these measures and does not intend to include them in the 2020–22 GSS.

Dated: June 22, 2020.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

NATIONAL SCIENCE FOUNDATION

Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit modification request received and permit issued.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated and permits issued under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act in the Code of Federal Regulations. This is the required notice of a requested permit modification and permit issued.

FOR FURTHER INFORMATION CONTACT: Nature McGinn, ACA Permit Officer, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; 703–292–8224; email: ACAPermits@nsf.gov.

SUPPLEMENTARY INFORMATION: The National Science Foundation (NSF), as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541, 45 CFR part 670), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection.

NSF issued a permit (ACA 2018–010) to David J. Smith on October 26, 2017. The issued permit allows the applicant to introduce non-indigenous species into Antarctica. Dormant microbiological samples, pre-loaded into and remaining within a triple containment vessel, were brought to Antarctica to be launched into the Earth's stratosphere as part of NASA's

Long Duration Balloon program (LDB). Details about the samples and the containment vessel are provided in the permit (attached). The microbiological samples, still contained within the vessel, will be returned to the USA and the home institution after recovery of the balloon payload.

A recent modification to this permit, dated June 19, 2019, permitted the permit holder to continue to conduct permitted activities, under the original permit conditions, until March 31, 2023. Now, the permit holder proposes to include an additional species of microorganism to the next payload. The quantity and state (dormant) of the bacterial spores, as well as the sample and payload preparation methods, would be identical to the original permit. The Environmental Officer has reviewed the modification request and has determined that the amendment is not a material change to the permit, and it will have a less than a minor or transitory impact.

Dates of Permitted Activities: June 23, 2020 to March 31, 2023.

The permit modification was issued on June 23, 2020.

Erika N. Davis,

Program Specialist, Office of Polar Programs.
