m. The existing American Falls Hydroelectric Project is located at

Reclamation's American Falls Dam and consists of: (1) three 18-foot-diameter, 240-foot-long, steel-lined penstocks, that connect upstream with similar U.S. Bureau of Reclamation's penstocks and the intake works; (2) a reinforced concrete powerhouse containing three 22.5 MW turbines for total installed capacity of 67.5 MW; (3) a 2,300-foot-long, 138-kilovolt (kV) overhead transmission line extending from the powerhouse downstream to the American Falls Switchyard; (4) a tailrace; (5) recreation facilities; and (6) appurtenant facilities. The project generates an annual average of 395,000 megawatt-hours.

The project is operated in a run-of-river mode and generates an estimated average of 40,669 megawatt-hours per year.

Idaho Power is not proposing any changes to the current operations of the project, as project operations are completely dependent on Reclamation's operation of the dam and available flows.

As part of the license application, Idaho Power filed a settlement agreement between itself and the Idaho Department of Fish and Game (IDFG) that resolves issues related to project effects of turbine mortality on trout. As part of the settlement agreement, Idaho Power proposes to increase the poundage of hatchery-reared trout to be stocked by Idaho Power annually from 8,000-pounds to 24,000-pounds, with the size (fish per pound), time of stocking, and location determined by IDFG in consultation with Idaho Power. Before release, IDFG will certify the general health and condition of the fish.

[Docket No. RM98-1-000]

Records Governing Off-the-Record Communications; Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any

responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission.
