The Trustees have a Memorandum of Agreement which establishes a Trustee Council to develop and implement a restoration plan for ecological restorations in the Alamosa River watershed. The Trustees followed the NRDAR regulations found at 43 CFR part 11 for development of the draft plan. The Trustees have worked together, in a cooperative process, to determine appropriate restoration activities to address natural resource injuries caused by Summitville releases of hazardous substances, as well as other watershed impacts identified during planning. The draft plan addresses the Trustees' overall approach to restore, rehabilitate, replace or acquire the equivalent of natural resources injured by the release of toxic metals into the Alamosa River watershed environment. Comments received during the above public comment period will be incorporated into a final document as appropriate.
