

EIS and can be used to submit scoping comments. Scoping comments can also be submitted to Mountain Home AFB Airspace EIS, c/o Leidos, 1740 East Fairview Ave., PMB 20, Meridian, ID 83642.

SUPPLEMENTARY INFORMATION: Mountain Home AFB managed airspace consists of six Military Operations Areas (MOAs) with airspace over portions of Idaho, Nevada, and Oregon and two USAF ranges in Idaho for inert weapons deployment. The Jarbidge North and Owyhee North MOAs have operational floors at 100 feet above ground level (AGL). The other four MOAs (Jarbidge South, Owyhee South, Paradise North, and Paradise South) have operational floors at 10,000 feet mean sea level (MSL) or 3,000 feet AGL, whichever is higher. Supersonic aircraft flights are permitted above 30,000 feet MSL within all the MOAs except over the Duck Valley Indian Reservation. Supersonic events above 10,000 feet AGL are permitted only in the Jarbidge North and Owyhee North MOAs.

Modifying this airspace will allow the USAF to provide a more realistic and efficient airspace training environment and improve aircrew proficiency in low-altitude tactics and radar masking using mountainous terrain for survival in a highly contested environment. The proposed airspace changes include: (1) changing low-altitude operational airspace floors that currently prohibit realistic low-altitude training (LOWAT) certification and maintenance training and negatively impact vertical capability and capacity, (2) providing consistent low-level operational floors for low-altitude flights to allow use of topographic features of mountainous terrain to mask the aircraft and safely neutralize or avoid technologically advanced threats, and (3) allowing aircrews to descend at supersonic speed and to fly at lower supersonic altitudes so they can realistically train on evasive maneuvers.

While only a small portion of overall flights, any low-altitude operations would be subject to specific limitations; however, these operations are essential for training and mission completion. Alternatives that address the training requirements will be defined as reasonable alternatives for analysis in the EIS. The analysis will also include the No Action Alternative which provides a benchmark to enable USAF decision-makers to compare the magnitude of the potential environmental effects of the Proposed Action. The Federal Aviation Administration is a Cooperating Agency for this EIS.

Scoping and Agency Coordination: To effectively define the full range of issues to be evaluated in the EIS, the USAF will solicit written comments from interested local, state, and federal agencies and elected officials, Native American tribes, interested members of the public, and others. Public scoping meetings will be held in the local communities beneath or adjacent to the airspace. The scheduled dates, times, locations, and addresses for the public scoping meetings are concurrently being published in local media.

The

following administrative controls are also applied to restrict access to those who require the data in the performance of their official duties: Periodic security audits; regular monitoring of users' security practices; methods to ensure only authorized personnel have access to personally identifiable information; encryption of backups containing sensitive data; and backups secured offsite.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system should address inquiries to the Office of the Secretary of Defense/Joint Staff, Freedom of Information Act Requester Service Center, Office of Freedom of Information, 1155 Defense Pentagon, Washington, DC 20301-1155.
