Endangered and Threatened Wildlife and Plants; Listing Casey’s June Beetle (*Dinacoma caseyi*) as Endangered and Designation of Critical Habitat

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to list Casey’s June beetle (*Dinacoma caseyi*) as endangered under the Endangered Species Act and propose to designate approximately 777 acres (ac) (314 hectares (ha)) of land as critical habitat for Casey’s June beetle in south Palm Springs, Riverside County, California. This species inhabits desert chaparral plant communities associated with gently sloping, depositional surfaces formed at the base of the Santa Rosa Mountains in the Coachella Valley region. This proposed rule, if made final, would implement Federal protection provided by the Act.

Therefore, we request comments or suggestions on this proposed rule from the public, tribes, other concerned governmental agencies, the scientific community, industry, or any other interested parties. We particularly seek comments concerning:

(1) Any available information on known or suspected threats and proposed or ongoing projects with the potential to threaten Casey’s June beetle, specifically: (a) The present or threatened destruction, modification or curtailment of its habitat or range; (b) overutilization for commercial, recreational, scientific, or educational purposes; (c) disease or predation; (d) the inadequacy of existing regulatory mechanisms; and (e) other natural or manmade factors affecting its continued existence;

(2) The reasons why we should or should not designate habitat as “critical habitat” under section 4 of the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*), including whether there are threats to the species from human activity, the degree of which can be expected to increase due to the designation, and
