serve a copy of the document on that resource agency.

k. *Description of Request:* Domtar Paper Company, LLC (licensee) has determined that the repair of five inoperable turbine generating units (Units 1, 2, 4, 5, and 6) is not cost effective, and therefore, proposes to retire the five units in place. The other two turbine generating units at the project (Units 3 and 7) would remain in service, with no changes proposed by the licensee. To retire the five units, the licensee proposes to disconnect the generator leads from the units. All proposed activity would occur in the powerhouse, with no ground disturbing activity necessary. With both the powerhouse and the spillway section of the dam currently releasing flows into the main channel of the Wisconsin River downstream, the proposal would result in a reduced flow through the powerhouse and an increased flow over the spillway. The proposal would decrease the total authorized capacity of the project from 3,708 to 948 kilowatts and would decrease the hydraulic capacity from 3,850 to 1,100 cubic feet per second.
