201 12TH STREET SOUTH, STE 203
ARLINGTON, VA 22202-5408

The Honorable John A. Boehner
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

JUN 1 2011

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 11-22, concerning the Department of the Air Force's proposed Letter(s) of Offer and Acceptance to Australia for defense articles and services estimated to cost \$202 million. After this letter is delivered to your office, we plan to issue a press statement to notify the public of this proposed sale.

Sincerely,

William E. Landay III
Vice Admiral, USN
Director

- (viii) Date Report Delivered to Congress: JUN 1 2011

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATIONAustralia – AIM-120C-7 Advanced Medium Range Air-to-Air Missiles

The Government of Australia requested a possible sale of up to 110 AIM-120C-7 Advanced Medium-Range Air-to-Air Missiles, 10 AIM-120C-7 Air Vehicle-Instrumented, 16 AIM-120C-7 Captive Air Training Missiles, containers, weapon system support equipment, support and test equipment, site survey, transportation, repair and return, warranties, spare and repair parts, publications and technical data, maintenance, personnel training and training equipment, U.S. Government and contractor representative engineering, logistics, and technical support services, and other related elements of logistics support. The estimated cost is \$202 million.

Australia is one of our most important allies in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the region. Australia's Government policy places interoperability with US Forces as an important goal and objective for equipment acquisition. Accordingly, and in line with the overall procurement strategy, Australia seeks an acquisition FMS case which supports the procurement, integration and introduction into service of the AIM-120C-7 system for the F/A-18F Australian Super Hornet.

The proposed sale will allow the Australian Defense Force to complete Australia's F/A-18 program under their Project AIR 5349. Phase I allowed acquisition of F/A-18 Block II aircraft and Phase II is for the acquisition of weapons. This proposed sale will provide standoff weapon capability required for Bridge Air Combat Capability for the Royal Australian Air Force. In addition, the upgrade is being viewed as an important step in maintaining interoperability with the U.S. Air Force. Australia will have no difficulty absorbing this new capability into its military.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Raytheon Missile System Corporation in Tucson, Arizona. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Australia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 11-22

Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act

Annex
Item No. vii

(vii) Sensitivity of Technology:

1. The AIM-120C-7 Advanced Medium Range Air-to-Air Missile (AMRAAM) is a new generation air-to-air missile. The AIM-120C-7 AMRAAM hardware, including the missile guidance section, is classified Confidential. State-of-the-art technology is used in the missile to provide it with unique beyond-visual-range capability. Significant AIM-120C-7 features include a target detection device with embedded electronic countermeasures, an electronics unit within the guidance section that performs all radar signal processing, mid-course and terminal guidance, flight control, target detection and warhead burst point determination. Anti-tampering security measures have been incorporated into the AIM-120C-7 to prevent exploitation of the AMRAAM software.

2. The AIM-120C-7 Air Vehicle-Instrumentation is an instrumented version of the missile where the warhead is replaced with a telemetry unit to capture missile data parameters during missile live-fire flight testing.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
