SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Notice of Proposed Rulemaking*, MB Docket No. 21-176; RM-11903; DA 21-459, adopted April 21, 2021, and released April 21, 2021. The full text of this document is available for download at <https://www.fcc.gov/edocs>. In support of its channel substitution request, the Petitioner states that the Commission has recognized that VHF channels have certain propagation characteristics which may cause reception issues for some viewers, and also that the reception of VHF signals requires larger antennas, that are generally not well suited to the mobile applications expected under flexible use, relative to UHF channels. According to the Petitioner, KECI-TV has received numerous complaints from viewers unable to receive an over-the-air signal, despite being able to receive signals from other stations. In addition, the Petitioner states that while the proposed channel 20 noise limited contour does not completely encompass the relevant channel 13 noise limited contour, there would be a loss of service to only 65 people. In addition, the Petitioner states that KECI-TV's proposed channel 20 facility is predicted to serve a total of 252,689 persons, a net gain of 38,879 potential viewers over the existing KECI-TV channel 13 facility. The Bureau used the technical parameters of KECI-TV's original post-transition digital channel 13 facility (File No. BPCDT-20080327AFR) in determining any

predicted loss which may occur from the proposed channel substitution.

Pursuant to §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated in the **DATES** section of this document.
