

include: The 50 states, the District of Columbia, five territories, authorized tribes with EPA-approved water quality standards (45 tribes as of February 2021), and a total of 18 additional tribal respondents over the three-year duration of the ICR. The total number of potential respondents is thus 119.

Respondent's obligation to respond: Some collections in this ICR are mandatory, some are required to obtain or retain benefits pursuant to the WQS Regulation, and some are voluntary.

Estimated number of respondents: 119.

Frequency of response: Variable (once every three years, on occasion or as necessary, or only once) depending on type of information collected.

Total estimated burden: 466,242 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$21,409,833 in labor costs and \$263,520 in operations and maintenance costs per year. There are no annualized capital costs.

Change in estimates: A decrease of 41,645 hours in estimated respondent burden compared with the currently approved ICR. The decrease reflects removal of one completed collection and transfer and consolidation of two collections with the ICR of another program, and adjustments to reflect changes in the estimated number of respondents.
