We are adding a new CMS-855 Medicare Registration Application, the CMS-855C: Medicare Enrollment Application for Registration of Eligible Entities That Provide Health Insurance Coverage Complementary to Medicare Part B. DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2013-P-0303]

Determination That METADATE ER (Methylphenidate Hydrochloride) Extended-Release Tablet, 10 Milligrams, Was Not Withdrawn From Sale for Reasons of Safety or Effectiveness

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined that METADATE ER (methylphenidate hydrochloride (HCl)) extended-release tablet, 10 milligrams (mg), was not withdrawn from sale for reasons of safety or effectiveness. This determination will allow FDA to approve abbreviated new drug applications (ANDAs) for methylphenidate HCl extended-release tablet, 10 mg, if all other legal and regulatory requirements are met.

FOR FURTHER INFORMATION CONTACT:

Reena Raman, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, rm. 6238, Silver Spring, MD 20993-0002, 301-796-7577.

SUPPLEMENTARY INFORMATION: In 1984, Congress enacted the Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) (the 1984 amendments), which authorized the approval of duplicate versions of drug products under an ANDA procedure. ANDA applicants must, with certain exceptions, show that the drug for which they are seeking approval contains the same active ingredient in the same strength and dosage form as the "listed drug," which is a version of the drug that was previously approved. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA).

The 1984 amendments include what is now section 505(j)(7) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)(7)), which requires FDA to

publish a list of all approved drugs. FDA publishes this list as part of the "Approved Drug Products with Therapeutic Equivalence Evaluations," which is known generally as the "Orange Book." Under FDA regulations, drugs are removed from the list if the Agency withdraws or suspends approval of the drug's NDA or ANDA for reasons of safety or effectiveness or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

A person may petition the Agency to determine, or the Agency may determine on its own initiative, whether a listed drug was withdrawn from sale for reasons of safety or effectiveness. This determination may be made at any time after the drug has been withdrawn from sale, but must be made prior to approving an ANDA that refers to the listed drug (§ 314.161 (21 CFR 314.161)). FDA may not approve an ANDA that does not refer to a listed drug.

METADATE ER (methylphenidate HCl) extended-release tablet, 10 mg, is the subject of ANDA 40-306, held by UCB, Inc., and initially approved on October 20, 1999. METADATE ER is indicated as an integral part of a total treatment program which typically includes other remedial measures (psychological, educational, social) for a stabilizing effect in children with a behavioral syndrome characterized by the following group of developmentally inappropriate symptoms: Moderately-to-severe distractibility, short attention span, hyperactivity, emotional lability, and impulsivity.

In a letter dated November 4, 2011, UCB, Inc., notified FDA that METADATE ER (methylphenidate HCl) extended-release tablet, 10 mg, had been discontinued, and FDA moved the drug product to the "Discontinued Drug Product List" section of the Orange Book.

Tedor Pharma Inc. submitted a citizen petition dated March 6, 2013 (Docket No. FDA-2013-P-0303), under 21 CFR 10.30, requesting that the Agency determine whether METADATE ER (methylphenidate HCl) extended-release tablet, 10 mg, was withdrawn from sale for reasons of safety or effectiveness.

After considering the citizen petition and reviewing Agency records and based on the information we have at this time, FDA has determined under § 314.161 that METADATE ER (methylphenidate HCl) extended-release tablet, 10 mg, was not withdrawn for reasons of safety or effectiveness. The petitioner has identified no data or other information suggesting that METADATE ER (methylphenidate HCl) extended-release tablet, 10 mg, was withdrawn for
