

IV. Conclusions

In consideration of the above, the NRC staff finds that reasonable assurance exists that adequate funds will be available in the TMI-1 DTF to complete radiological decommissioning of the site and to terminate the TMI-1 license, with excess funding available to pay for spent fuel management (previously approved) and site restoration activities within the scope of the exemption request. There is no

decrease in safety associated with the DTF being used to fund activities associated with site restoration.

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the exemptions are authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security. Also, special circumstances are present. Therefore, the Commission hereby grants CEG the exemptions from the

requirements of 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(1)(iv) to allow CEG to use of a portion of the funds from the TMI-1 DTF for site restoration activities, without prior NRC notification.

The exemptions are effective upon issuance.
