

may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

k. *Description of Request:* (1) *Extension of Time:* The Districts request an extension of time for the commencement of project construction to December 13, 2009, pursuant to Public Law 109–383. The Districts also propose changes, where necessary, to dates or time periods specified in various license articles such that the dates or time periods for taking action would be tied to an order amending the project license; (2) *Amendment to Project Design:* The Districts propose to install two 7.5-megawatt (MW) generating units with a total installed capacity of 15 MW instead of installing two 30-MW generating units with a total installed capacity of 60 MW, as authorized in the March 27, 1989 Order Issuing License. The Districts also propose to change the project's transmission line, which would decrease in length by approximately 10 miles and would eliminate the need to use any lands managed by the Bureau of Land Management. The Districts request the deletion and/or revision of certain license articles that are directly related to the above proposed design changes.
