

SUPPLEMENTARY INFORMATION: Section 104(b) of the Consumer Product Safety Improvement Act of 2008 (CPSIA) requires the Commission to adopt mandatory standards for durable infant or toddler products. 15 U.S.C. 2056a(b)(1). Mandatory standards must be “substantially the same as” voluntary standards, or may be “more stringent” than voluntary standards, if the Commission determines that more stringent requirements would further reduce the risk of injury associated with the products. *Id.* Mandatory standards may be based, in whole or in part, on a voluntary standard.

Pursuant to section 104(b)(4)(B) of the CPSIA, if a voluntary standard organization revises a standard that has been adopted, in whole or in part, as a consumer product safety standard under CPSIA section 104, it must notify the Commission. The revised voluntary standard then shall be considered to be a consumer product safety standard issued by the Commission under section 9 of the Consumer Product Safety Act (15 U.S.C. 2058), effective 180 days after the date on which the organization notifies the Commission (or a later date specified by the Commission in the **Federal Register**) unless, within 90 days after receiving that notice, the Commission responds to the organization that it has determined that the proposed revision does not improve the safety of the consumer product covered by the standard, and therefore the Commission is retaining its existing mandatory consumer product safety standard. 15 U.S.C. 2056a(b)(4)(B).

Under this authority, on January 15, 2014, the Commission issued a mandatory safety rule for children’s bedside sleepers (79 FR 2589). The rulemaking created 16 CFR part 1222, which incorporates by reference, with modifications, ASTM F2906–13, *Standard Consumer Safety Specification for Bedside Sleepers*. The modifications under § 1222.2(b) require that bedside sleepers be tested to the mandatory Safety Standard for Bassinets and Cradles, codified at 16 CFR part 1218.

ASTM F2906 describes bedside sleepers as products intended to provide sleeping space for an infant up to approximately 5 months of age (or when child begins to push up on hands and knees). The standard states that these products are intended to be secured to the side of an adult bed for the purpose of having a baby sleep in close proximity to an adult. The minimum required side-height for bedside sleepers generally is the same as bassinets, 7.5 inches. However, for the side of the sleeper that attaches to an adult bed, the

minimum side-height is 4 inches. The mandatory standard also includes performance requirements and test methods, as well as requirements for warning labels and instructions, to address hazards to children associated with children’s bedside sleepers.

Since publishing the 2013 version of ASTM F2906, ASTM published revisions in 2022 and 2023. ASTM published ASTM F2906–22 on October 1, 2022, to clarify side-height and attachment requirements for bedside sleepers. However, CPSC understands that ASTM discovered an error in the publication allowing for an unintended side-height exemption for the side of the product that attaches to an adult bed, for certain products, and therefore did not notify the Commission of this revision. On January 1, 2023, ASTM published a revised version of the incorporated voluntary standard, ASTM F2906–23, that removes the unintended exemption. On February 6, 2023, ASTM notified the Commission that it had approved and published ASTM F2906–23. CPSC staff is assessing the revised voluntary standard to determine, consistent with section 104(b)(4)(B) of the CPSIA, its effect on the safety of consumer products covered by the standard, namely bedside sleepers. The Commission invites public comment on that question, to inform staff’s assessment and any subsequent Commission consideration of the revisions in ASTM F2906–23.¹

The incorporated voluntary standard and the two revised voluntary standards, ASTM F2906–22 and –23, are available for review in several ways. ASTM has provided on its website (at <https://www.astm.org/CPSC.htm>), at no cost, a read-only copy of both the 2022 and 2023 revisions to ASTM F2906, including red-lined versions that identify the changes made to ASTM F2906–13 and ASTM F2906–22. Likewise, a read-only copy of the existing, incorporated standard (ASTM F2906–13) is available for viewing, at no cost, on the ASTM website at: <https://www.astm.org/READINGLIBRARY/>. Interested parties can also download copies of the standards by purchasing them from ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428–2959; phone: 610–832–9585; <https://www.astm.org>. Alternatively, interested parties can schedule an appointment to inspect copies of the standards at CPSC’s Office of the Secretary, U.S. Consumer Product Safety Commission, 4330 East West

Highway, Bethesda, MD 20814, telephone: 301–504–7479.

Comments must be received by March 3, 2023. Because of the short statutory time frame Congress established for the Commission to consider revised voluntary standards under section 104(b)(4) of the CPSIA, CPSC will not consider comments received after this date.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.
