BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 02-1764; MM Docket No. 01-307; RM-10307]

Radio Broadcasting Services; Camp Wood, TX

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots Channel 271A to Camp Wood, Texas, in response to a petition filed by Linda Crawford. See 66 FR 56630, November 9, 2001. The coordinates for Channel 271A at Camp Wood are 29-48-01 and 100-02-35. There is a site restriction 14.8 kilometers (9.2 miles) north of the community. Although Mexican concurrence has been requested for the allotment of Channel 271A at Camp Wood, notification has not been received. Therefore, operation with the facilities specified for Camp Wood herein is subject to modification, suspension, or termination without right to hearing, if found by the Commission to be necessary in order to conform to the 1992 USA-Mexico FM Broadcast Agreement or if specifically objected to by Mexico. With this action, this proceeding is terminated. A filing window for Channel 271A at Camp Wood will not be opened at this time. Instead, the issue of opening this allotment for auction will be addressed by the Commission in a subsequent order.

DATES: Effective September 16, 2002.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Media Bureau, (202) 418-2180.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 01-307, adopted July 17, 2002, and released August 2, 2002. The full text of this Commission decision is available for

inspection and copying during regular business hours in the FCC Information Center, Portals II, 445 12th Street, SW., Room CY-A257, Washington, DC 20554. The complete text of this decision may also be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW., Room CY-B402, Washington, DC, 20554, (202) 863-2893, facsimile (202) 863-2898, or via e-mail qualexint@aol.com.

[DA 02-1875; MM Docket No. 02-25; RM-10361]

Radio Broadcasting Services; Beverly Hills and Spring Hill, FL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission reallocates Channel 292C3 from Beverly Hills to Spring Hill, Florida, as the community's first local aural transmission service, and modifies WGUL-FM, Inc.'s license for Station WGUL-FM to reflect the change of community. See 67 FR 8219 (02/22/2002). Coordinates for Channel 292C3 at Spring Hill are: NL 28-36-00 and WL 82-33-45.

DATES: Effective September 16, 2002.

FOR FURTHER INFORMATION CONTACT: Victoria M. McCauley, Media Bureau, (202) 418-2180.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

Radio Broadcasting Services; Various Locations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, on its own motion, editorially amends the Table of FM Allotments to specify the actual classes of channels allotted to various communities. The changes in channel classifications have been authorized in response to applications filed by licensees and permittees operating on these channels. This action is taken pursuant to *Revision of Section 73.3573(a)(1) of the Commission's Rules Concerning the Lower Classification of an FM Allotment*, 4 FCC Rcd 2413 (1989), and the *Amendment of the Commission's Rules to permit FM*

Channel and Class Modifications [Upgrades] by Applications, 8 FCC Rcd 4735 (1993).

DATES: Effective August 14, 2002.

BILLING CODE 6712-01-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AI19

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for the Tumbling Creek Cavesnail

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the Fish and Wildlife Service (Service), determine the Tumbling Creek cavesnail (*Antrobia culveri*) to be an endangered species under the Endangered Species Act of 1973, as amended (Act). This species is known to occur in one cave in Missouri. The distribution of this species in Tumbling Creek has decreased by 90 percent since 1974. Although cavesnail numbers fluctuated seasonally and annually between 1996 and 2000, the species was not found in the monitored section of the cave stream during six surveys in 2001 and two surveys in 2002. Small numbers of individuals continue to exist in other portions of the cave stream. Because the sudden population decline demonstrates a significant and imminent risk to the well-being of the Tumbling Creek cavesnail, we find that listing this species is necessary to provide Federal protection pursuant to the Act.

DATES: This final rule is effective August 14, 2002.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Columbia Field Office, 608 E. Cherry St., Room 200, Columbia, MO 65201-7712.

FOR FURTHER INFORMATION CONTACT: Paul McKenzie, Ph.D., Columbia Field Office (see **ADDRESSES**) (telephone: 573-876-1911, ext. 107; e-mail: paul_mckenzie@fws.gov; facsimile: 573-876-1914). Individuals who are hearing-impaired or speech-impaired may call the Federal Relay Service at 1-800-877-8337 for TTY assistance.

SUPPLEMENTARY INFORMATION:

Background

The Tumbling Creek cavesnail (*Antrobia culveri*) was described as a new species by Hubricht (1971) from specimens taken by David Culver, Thomas Aley, and Leslie Hubricht in 1969 and 1970. *Antrobia culveri* is the type species for the genus *Antrobia*, also described new to science in 1971 by Hubricht. Hershler and Hubricht (1988) examined specimens of *A. culveri* and confirmed the taxonomic placement of this species in the subfamily Littoridininae of the Gastropod family Hydrobiidae. They also noted the similarity of the genus *Antrobia* to, but distinguished it from, the genus *Fontigens*, which contains cave-adapted snails found in other caves and springs of the Ozark Plateau in Missouri and Arkansas. The Tumbling Creek cavesnail is a small, white, blind, aquatic snail. Hubricht (1971) provided the following measurements of the type specimen: height 2.3 millimeters (mm) (0.09 inches (in)); diameter 2.0 mm (0.08 in); aperture height 1.2 mm (0.05 in); aperture diameter 1.1 mm (0.04 in); with a small, conical, well-rounded, pale-yellow shell containing about 3.5 whorls (Hubricht 1971). The Tumbling Creek cavesnail is restricted to a single cave stream in Tumbling Creek Cave in Taney County, southwestern Missouri.

Greenlee (1974) provided the first information on the habitat of the species. He reported that the species was found primarily on "3 inch gravel substrate" (presumably meaning small stones or cobble of 3-inch (7.5 cm) diameter), with a few individuals observed using the recesses of a solid rock stream bottom. Greenlee's use of a Surber Sampler, however, may have biased his survey to search for rocks smaller than 25 cm (10 in) in diameter (Julian J. Lewis, J. Lewis & Associates, Clarksville, IN; *in litt.*, January 27, 2002). Greenlee (1974) did not note whether the snails used the upper or lower surface of the 3-inch gravel he observed them on, or whether the species was ever observed using larger rocks within the cave stream. Subsequent surveyors, however, have failed to document *A. culveri* using a solid rock bottom, and the species is usually observed on the undersurface of rocks and gravel of various sizes (Ashley unpub. data; McKenzie *in litt.*, September 16, 1996; Ashley and McKenzie, pers. obs.). Although Greenlee (1974) stated that the Tumbling Creek cavesnail was absent from areas of the stream that contained bat guano, subsequent observers (Ashley 2001a; Ashley and McKenzie, pers. obs.) have noted *A. culveri* in portions of
