Estimated Annual Costs to the Federal Government

This data collection effort is one aspect of a larger effort focused on reducing healthcare associated infections. The cost of developing the data collection instruments by a one-time statistical support task order is \$25,000. The costs of implementing the data collection instruments and analyzing and publishing the results are \$108,650 annually. Finally, the estimated costs for federal staff time for supporting the common data collection efforts are \$24,000 annually. Thus, the estimated annual cost to the federal government is \$145,150.
