

(7) *Consumer Credit Card Product Innovation and Competition*

a. How has credit card product innovation changed since the CFPB reported on the credit card market in 2021? What has driven those changes or lack of changes? Has the impact of the CARD Act on product innovation changed over the past two years?

b. How is competition in the consumer credit card market changing? How has the CARD Act (positively or negatively) impacted competition between credit card issuers? How, if at all, do these changes and impacts relate to the cost or availability of consumer credit cards?

c. What barriers to entry, if any, exist in the consumer credit market? What obstacles may smaller financial institutions face when launching a credit card product? How are these impediments changing and what, if any, trends are evolving? To what extent are financial institutions adopting “credit card-as-a-service” offerings? How might these changes affect competition, promote innovation, or introduce risk, if at all?

d. How have broader innovations in finance, such as (but not limited to) new products and entrants offering unique features (like rewards redemption for cryptocurrency, environmental causes, and other categories beyond cash-back or points), evolving digital tools, greater availability of and new applications for consumer data, and new technological tools (like machine learning), impacted the consumer credit card market, either directly or indirectly? In what ways do CARD Act provisions encourage or discourage innovation? In what ways do innovations increase or decrease the impact of certain CARD Act provisions, or change the nature of those impacts?

e. How do innovations by firms offering other consumer financial products and services (such as buy-now-pay-later credit, mobile payments, or non-card point-of-sale loans) compete with credit cards, and to what extent do consumers view them as effective alternatives to or substitutes for credit cards?
