

practice-based evidence and issues recommendations. CPSTF recommendations are not mandates for compliance or resource allocation. Instead, they provide information about evidence-based options that decision makers and stakeholders can consider when they are determining what best meets the specific needs, preferences, available resources, and constraints of their jurisdictions and constituents. The CPSTF's recommendations, along with the systematic reviews of the evidence on which they are based, are compiled in the *The Community Guide*.

Matters proposed for discussion: The CPSTF will discuss the 2020 process for establishing its priority topics for 2021–2025 during a closed session the first half of the day. During the afternoon session which is open to the public, the CPSTF will deliberate on systematic reviews of literature related to the following: HIV Prevention: Clinical Decision Support Systems to Increase HIV Screening; Cardiovascular Disease Prevention and Control: Economics of Pharmacy-Based Interventions to Increase Medication Adherence; and one or more proposals for new reviews in the areas of mental health, sleep health, tobacco prevention and control. The agenda is subject to change without prior notice; however, agenda updates will be posted on the the Community Guide website (www.thecommunityguide.org).

Dated: January 27, 2020.
