EPA requests that the public provide to EPA any water quality related data and information that may be relevant to the calculations for the 85 TMDLs. EPA will review all data and information submitted during the public comment period and revise the TMDLs where appropriate. EPA will then forward the TMDLs to the Louisiana Department of Environmental Quality (LDEQ). The LDEQ will incorporate the TMDLs into its current water quality management plan.

Dated: July 13, 2006.

Miguel I. Flores,

Director, Water Quality Protection Division (6WQ).

Proposed Project

National Ambulatory Medical Care Survey (NAMCS) 2007-2008 (OMB No. 0920-0234)—Revision—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The National Ambulatory Medical Care Survey (NAMCS) was conducted annually from 1973 to 1981, again in 1985, and resumed as an annual survey in 1989. The purpose of NAMCS is to meet the needs and demands for statistical information about the provision of ambulatory medical care services in the United States.

Ambulatory services are rendered in a wide variety of settings, including physicians' offices and hospital outpatient and emergency departments. The NAMCS target population consists of all office visits made by ambulatory patients to non-Federal office-based physicians (excluding those in the specialties of anesthesiology, radiology, and pathology) who are engaged in direct patient care. For the first time in 2006, physicians and mid-level providers (i.e., nurse practitioners, physician assistants, and nurse midwives) practicing in community health centers (CHCs) were added to the NAMCS sample, and these data will continue to be collected in 2007-2008. To complement NAMCS data, NCHS initiated the National Hospital Ambulatory Medical Care Survey (NHAMCS, OMB No. 0920-0278) to provide data concerning patient visits to hospital outpatient and emergency departments.

The NAMCS provides a range of baseline data on the characteristics of the users and providers of ambulatory medical care. Data collected include the patients' demographic characteristics, reason(s) for visit, physicians' diagnosis(es), diagnostic services, medications, and visit disposition. In addition, a Cervical Cancer Screening Supplement (CCSS) will continue to be a key focus in 2007-2008. The CCSS collects information on cervical cancer screening practices performed by selected physician specialties. It will allow the CDC/National Center for Chronic Disease Prevention and Health Promotion to evaluate cervical cancer screening methods and the use of human papillomavirus tests.

Users of NAMCS data include, but are not limited to, congressional offices,
