SUPPLEMENTARY INFORMATION:

Supporting documents (which explain in detail the information that the EPA will be collecting) are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person as described in the **ADDRESSES** section. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments

and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

This ICR package is a renewal of an existing collection, "Recordkeeping and Reporting for the Renewable Fuel Standard Program," OMB Control Number 2060-0725, expiring August 31, 2022. The RFS regulations are in 40 CFR part 80, subpart M. Because it is more efficient and easier for regulated parties to understand, we seek to consolidate the following approved ICRs into this collection:

- Modifications to Fuel Regulations to Provide Flexibility for E15; Modifications to RFS RIN Market Regulations (Final Rule), OMB Control Number 2060-0723, expiring November 30, 2022; and
- Renewable Fuel Standard Program: Standards for 2020 and Biomass-Based Diesel Volume for 2021, Response to the Remand of the 2016 Standards, and Other Changes (Final Rule), OMB Control Number 2060-0728, expiring December 31, 2023.

When this ICR renewal of 2060-0725 is complete, and once it is approved by OMB, we will seek to cancel 2060-0723 and 2060-0728, as they will no longer be necessary.

What is the RFS program?

The RFS program was created under the Energy Policy Act of 2005 (EPAct), which amended the Clean Air Act (CAA). The Energy Independence and Security Act of 2007 (EISA) further amended the CAA by expanding the RFS program. EPA implements RFS in consultation with U.S. Department of

Agriculture and the Department of Energy. The RFS program is a national policy that requires a certain volume of renewable fuel to replace or reduce the quantity of petroleum-based transportation fuel, heating oil or jet fuel.

Obligated parties under the RFS program are refiners or importers of gasoline or diesel fuel. Obligated parties, and exporters of renewable fuel, must meet an annual Renewable Volume Obligation (RVO). Parties meet their RVO by blending renewable fuels into transportation fuel, or by obtaining credits (called "Renewable Identification Numbers", or RINs). EPA calculates and establishes RVOs every year through rulemaking, based on the CAA volume requirements and projections of gasoline and diesel production for the coming year. The standards are converted into a percentage and obligated parties must demonstrate compliance annually. RINs are the credits that obligated parties use to demonstrate compliance with the standard. RINs are generated by producers and importers of renewable fuels and traded by various parties. Obligated parties must obtain sufficient RINs for each category to demonstrate compliance with the annual standard.

To track compliance with the RFS program, various parties involved with the production and blending of renewable fuels, and who generate, trade, or use RINs, must register with EPA, and submit various types of compliance reports related to the activity they engage in under the program. Our estimates as to burden are explained in the supporting statement that has been placed in the public docket. Domestic and foreign entities may be subject to these regulations and to the associated information collection. The RFS program was developed with certain flexibilities, including for small entities such as small refiners and small refineries, small blenders, and small volume production facilities and importers.

What are the recordkeeping and reporting requirements associated with the RFS program?

The reporting requirements of the RFS program typically fall under registration and compliance reporting. Recordkeeping requirements include product transfer documents (PTDs) and retention of records that support items reported. Recordkeeping and reporting are based upon the role the party fills under the regulations. A party may be registered in more than one role. Basing the recordkeeping and reporting upon a party's roles in the program ensures that

parties must sustain only the burden necessary under the program. EPA continuously assesses its registration and reporting systems to provide the best possible service to the regulated community and to enhance, simplify, and streamline the experience. Because RFS relies upon a marketplace of RINs, EPA has created and maintains the EPA Moderated Transaction System (EMTS) capable of handling a high volume of RIN trading activities.

Who are the respondents for the RFS program?

The respondents to this ICR are: RIN Generators (producers and importers of renewable fuel), Obligated Parties (refiners and importers of gasoline and diesel), Exporters (of renewable fuel), RIN Owners, independent third-party Quality Assurance Plan (QAP) Providers, Third Parties (Auditors who submit reports on behalf of other respondents), and certain petitioners under the international aggregate compliance approach (such petitions are infrequent). These parties and their associated information collections are described in detail in the supporting statement and tables, which have been placed in the docket.

Respondents/affected entities: RIN Generators, Obligated Parties, RIN Owners, Exporters, QAP Providers, Third Parties (Auditors) and Petitioners under the international aggregate compliance approach. These parties include producers and importers of renewable fuels and refiners and importers of gasoline and diesel transportation fuels.

Respondent's obligation to respond: The RFS program represents a mixture of voluntary and mandatory reporting, depending upon activity. A single party may register with multiple program roles—e.g., a party might be both an obligated party and a RIN owner.

Estimated number of respondents: 45,473.

Frequency of response: On occasion/daily, quarterly, annual.

Total estimated burden: 859,218 hours. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: The total cost (labor and non-labor) is \$78,703,548, of which \$16,428,454 is non-labor costs (all of which are purchased services).

Changes in Estimates: There is a decrease in 68,670 hours in the total estimated respondent burden compared with the ICR(s) ³ currently approved by

OMB. This decrease is due to several factors, including a change in the number of respondents and certain, one-time requirements that have now been accomplished by respondents (e.g., one-time programming to comply with reporting; initial registration of certain respondents).

Director, Compliance Division, Office of Transportation & Air Quality, Office of Air & Radiation.
