* Regulation section 418.3670 could be used at any time; however, we currently have no data showing usage over the past three years.

** We based this figure on average DI payments (<https://www.ssa.gov/legislation/2020Fact%20Sheet.pdf>)

*** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. *There is no actual charge to respondents to complete the application.*

8. Electronic Records Express—20 CFR 404.1512 and 416.912—0960–0753. Electronic Records Express (ERE) is a Web-based SSA program which allows medical and educational providers to electronically submit disability claimant data to SSA. Both medical providers and other third parties with connections to disability applicants or recipients (e.g., teachers and school administrators for child disability applicants) use this system once they complete the

registration process. SSA employees and State agency employees request the medical and educational records collected through the ERE website. The agency uses the information collected through ERE to make a determination on an Application for Benefits. We also use the ERE website to order and receive consultative examinations when we are unable to collect enough medical records to determine disability findings. The respondents are medical providers

who evaluate or treat disability claimants or recipients, and other third parties with connections to disability applicants or recipients (e.g., teachers and school administrators for child disability applicants), who voluntarily choose to use ERE for submitting information.

Type of Request: Revision of an OMB-approved information collection.

ERE	6,183,548	1	10	1,030,591	* \$33.18	** \$34,195,009

* We based this figure by averaging both the average Healthcare Practitioners and Technical Occupations (<https://www.bls.gov/oes/current/oes290000.htm>), and Elementary and Secondary School worker's hourly wages, as reported by Bureau of Labor Statistics data (<https://www.bls.gov/oes/current/oes250000.htm>).

** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. *There is no actual charge to respondents to complete the application.*

validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

The Refugee Biographic Data Sheet describes a refugee applicant's personal characteristics and is needed to initiate refugee resettlement processing, adjudicate the refugee applicant's application for admission to the United States, to run security checks on refugees by intelligence and federal law enforcement agencies, to conduct medical screenings, and to plan international travel before a refugee applicant can be permitted to travel to the United States. In addition, the information is used to match the refugee with a sponsoring voluntary agency for initial reception and placement in the U.S. under the United States Refugee Admissions Program administered by the Bureau of Population, Refugees, and Migration.

The information collected includes date and place of birth, gender, contact information, including social media handles, marital status, family ties, religion, ethnic group, background, education, occupation, skills, medical information, English language ability, associated family members' refugee resettlement cases, and identity documents. The data is used to initiate refugee resettlement processing, to adjudicate the refugee claim by USCIS, to run security checks on refugees by the federal law enforcement and intelligence community before refugees can be permitted to travel to the United States. Data is also provided to conduct a medical screening before the refugee's arrival in the United States, to plan the refugee's international travel, and to resettlement agencies to determine an appropriate resettlement location in the United States. If the data were not collected, refugees could not be properly vetted by the federal law enforcement and intelligence community, and therefore refugee applicants could no longer be processed through the U.S. Refugee Admissions Program. In addition, the resettlement

agencies would not be able to provide appropriate initial reception and placement services as provided for in the Refugee Act.

Methodology

Biographic information is collected in a face-to-face intake process with the applicant overseas. An employee of a Resettlement Support Center, under cooperative agreement with PRM, collects the information and enters it into the Worldwide Refugee Admissions Processing System.

Zachary Parker,

Director.
